Happy Repairing!!

Highly Recommended Repair Ebook:

If you're a LCD Monitor repairer, then this is the best guide for you. Why? Because, the author revealed all his LCD Monitor Repairing secrets for you. I think, with just few Repair tips you learned from this guide you will get back your investment!

[Click Here to read](#) more.

This eBook will show you how to test the electronic component correctly and accurately. Some of you may say that I don't need this eBook because it is too simple! Do you know that, in fact there is lots of testing electronic components secrets I have learned from this guide? Do you know how to test a 'TRIAC' correctly and accurately? If you answer no then I guess you have to get this eBook. [Click Here to read more.](#)

Are you tired of searching the service manuals to look for the value of a burnt resistor? If the answer is YES, then this eBook is a 'must have' guide for you. You can save a lot of time and be able to repair customer's Electronic equipment with burnt resistors in it.

WARNING !!

AN ISOLATION TRANSFORMER SHOULD BE USED DURING ANY SERVICE WORK TO AVOID POSSIBLE SHOCK HAZARD DUE TO LIVE CHASSIS, THE CHASSIS OF THIS RECEIVER IS DIRECTLY CONNECTED TO THE POWER LINE.

SAFETY-RELATED COMPONENT WARNING !!

COMPONENTS IDENTIFIED BY SHADING AND MARKED Δ ON THE SCHEMATIC DIAGRAMS, EXPLODED VIEWS AND IN THE PARTS LIST ARE CRITICAL FOR SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

CAUTION

Lead Free Soldered Boards

The circuit boards listed below [Table 1] used in these models may have been processed using Lead Free Solder. The boards are identified by the LF logo located close to the board designation e.g. F1, H1 etc [see examples]. The servicing of these boards requires special precautions to be taken as outlined below.

example 1

example 2

Table 1

Board	Function
A	Tuner, Audio, Chroma Decoder, Scart 1
G2	Power Supply
H1	Control Buttons
H2	Front Input, HP Output
H3	Scart 2
H5	IR Receiver & LED's

It is strongly recommended to use Lead Free Solder material in order to guarantee optimal quality of new solder joints. Lead Free Solder is available under the following part numbers :

Partnumber	Diameter	Remarks
7-640-005-19	0.3mm	0.25Kg
7-640-005-20	0.4mm	0.50Kg
7-640-005-21	0.5mm	0.50Kg
7-640-005-22	0.6mm	0.25Kg
7-640-005-23	0.8mm	1.00Kg
7-640-005-24	1.0mm	1.00Kg
7-640-005-25	1.2mm	1.00Kg
7-640-005-26	1.6mm	1.00Kg

Due to the higher melting point of Lead Free Solder the soldering iron tip temperature needs to be set to 370 degrees centigrade. This requires soldering equipment capable of accurate temperature control coupled with a good heat recovery characteristics.

For more information on the use of Lead Free Solder, please refer to <http://www.sony-training.com>

WA1 SELF DIAGNOSTIC SOFTWARE

The identification of errors within the WA1 chassis is triggered in one of two ways :- 1: Busy or 2: Device failure to respond to IIC. In the event of one of these situations arising the software will first try to release the bus if busy (Failure to do so will report with a continuous flashing LED) and then communicate with each device in turn to establish if a device is faulty. If a device is found to be faulty the relevant device number will be displayed through the LED (Series of flashes which must be counted).

Flash Timing Example : e.g. error number 3

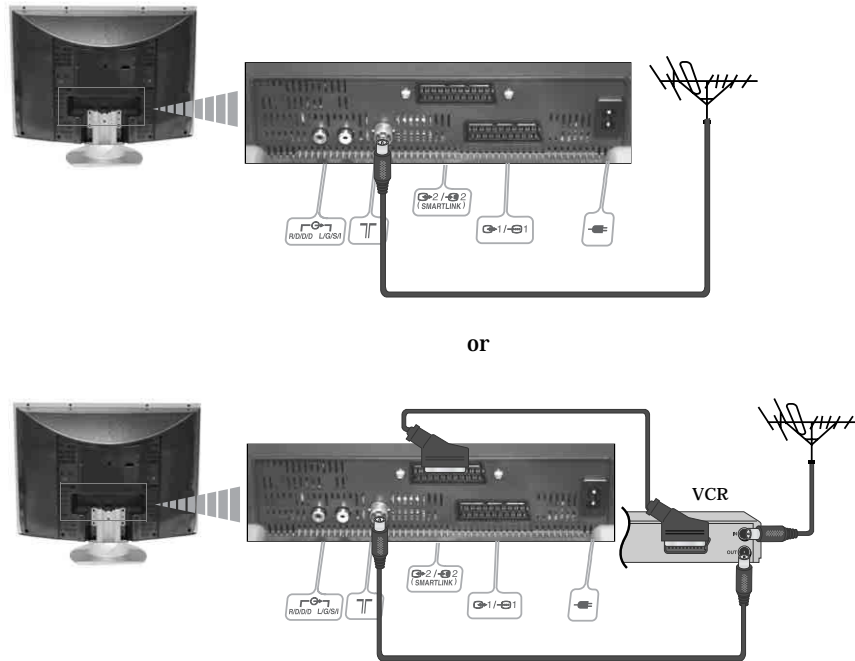

LED Error Code

LED ERROR CODE	ERROR DESCRIPTION
02	A Board Error
03	B Board Error
04	Panel Error
05	EEPROM Error
06	IIC Bus Error
09	Tuner Error
10	Sound Processor Error
11	Panel TV-SVP Error
12	CXA2163 Error
13	Port Expander 1 Error
14	Port Expander 2 Error

The operating instructions mentioned here are partial abstracts from the Operating Instruction Manual. The page numbers of the Operating Instruction Manual remain as in the manual.

Connecting the Aerial and VCR

or

Make sure to connect the aerial before the Start.

For more details regarding VCR connection, refer to "Connecting Equipment to the TV" on page 29.

First Time Operation

Switching On the TV and Automatically Tuning

The first time you switch on your TV, a sequence of menu screens appear on the TV enabling you to: 1) choose the language of the menu screen 2) choose the country in which you are going to operate the TV, 3) search and store all available channels (TV Broadcast) and 4) change the order in which the channels (TV Broadcast) appear on the screen.

However, if you need to change any of these settings at a later date, you can do that by selecting the appropriate option in the (Set Up menu) or by pressing and holding the Auto Start Up button on the top of TV set for more than three seconds, see page 11.

1 Connect the TV plug to the mains socket (220-240V AC, 50Hz).

2 The first time that the TV set is connected, it is usually turned on. If the TV is off, press the on/off button to turn on the TV. The first time you switch on the TV, a Language menu appears automatically on the TV screen.

3 Press the , , or buttons on the remote control to select your language, then press the OK button to confirm your selection. From now on all the menus will appear in your chosen language.

4 The Country menu appears automatically. Press the or button to select the country in which you are using the TV. Press the OK button to confirm your selection.

If the country in which you want to use the TV set does not appear in the list, select "-" instead of a country.

- 5** The Auto Tuning menu appears on the screen. Press the **OK** button to select **Yes**.

- 6** The TV starts to automatically search and store all available broadcast channels for you.

 This procedure could take some minutes. Please be patient and do not press any buttons, otherwise automatic tuning will not be completed.

 If no channels were found during the auto tune process, a message appears automatically on the screen asking you to connect the aerial. Check the aerial connection (refer to page 14). Press the **OK** button to restart the auto tuning process.

- 7** After all available channels are captured and stored, the Programme Sorting menu automatically appears on the screen enabling you to change the order in which the channels are stored.

a) If you wish to keep the broadcast channels in the tuned order, go to step 8.

b) If you wish to store the channels in a different order:

- 1 Press the **↓** or **↑** button to select the programme number with the channel (TV Broadcast) you wish to move. Press the **→** button.
- 2 Press the **↓** or **↑** button to select the new programme number position for your selected channel (TV Broadcast). Press the **OK** button to store
- 3 Repeat steps b)1 and b)2 if you wish to change the order of the other channels.

- 8** Press the **MENU** button to remove the menu from the screen

 Your TV set is now ready for use

TV Functions

Introducing and Using the Menu System

 Your TV set uses an On-Screen menu system to guide you through the operations. Use the following buttons on the Remote Control to operate the menu system:

- 1** To switch on the menu screens:

Press the **MENU** button to switch the first level menu on.

- 2** To navigate through the menus:

To highlight and select the desired menu or option, press **↓** or **↑**.

To enter the selected menu or option, press **→**.

To return to the last menu or option, press **←**.

To alter the settings of your selected option, press **↓/↑/←/→**.

To confirm and store your selection, press **OK**.

- 3** To switch off the menu screens:

Press the **MENU** button to remove the menu from the screen.

The Picture Adjustment Menu

 The "Picture Adjustment" menu allows you to alter the picture settings.

To do this:
Press the **MENU** button and then press **OK** to enter this menu. Next, press **↓** or **↑** to select the desired option and press **OK**. Finally, read below how to operate into each option.

Reset	Press OK to reset the picture to the factory preset levels.
Noise Reduction	This option is set to Auto to automatically reduce the snowy picture visible in the weak broadcast signal. However, it can be modified. After selecting this option press → . Next, press ↓ or ↑ to select Off . Finally, press OK to store.
Colour Tone	This option allows you to alter the tint of the picture. After selecting this option press → . Next, press repeatedly ↓ or ↑ to select: Warm (gives the white colours a red tint), Normal (gives the white colours a neutral tint), Cool (gives the white colours a blue tint). Finally press OK to store.

Picture Mode This option allows you to customise the picture mode based on the programme you are watching. After selecting this option press **OK**. Next, press repeatedly **↓** or **↑** to select:

- Live (for live broadcast programmes, DVD and Digital Set Top Box receivers).
- Personal (for individual settings).
- Movie (for films).

Once you have selected your desired option, press **OK** to store.

 "Brightness", "Colour", "Sharpness" and "Backlight" level of "Live" and "Movie" mode are fixed on the factory to get the best picture quality.

Contrast Press **←** or **→** to reduce or enhance picture contrast. Next, press **OK** to store.

Brightness Press **←** or **→** to darken or brighten the picture. Next, press **OK** to store.

 This option only appears and can only be adjusted if "Picture Mode" is set to "Personal".

Colour Press **←** or **→** to decrease or to increase color intensity. Next press **OK** to store.

 This option only appears and can only be adjusted if "Picture Mode" is set to "Personal".

Hue Press **←** or **→** to decrease or to increase the green tones. Next press **OK** to store.

 This option only appears for NTSC signal (e.g. USA video tapes).

Sharpness Press **←** or **→** to soften or to sharpen the picture. Next press **OK** to store.

 This option only appears and can only be adjusted if "Picture Mode" is set to "Personal".

Backlight Press **←** or **→** to darken or brighten the backlight.

 This option only appears and can only be adjusted if "Picture Mode" is set to "Personal".

The Sound Adjustment Menu

i The "Sound Adjustment" menu allows you to alter the sound settings.

To do this:
Press the **MENU** button and press **↓** to select **Picture Adjustment**, then press **OK** to enter this menu. Next, press **↓** or **↑** to select the desired option and press **OK**. Finally, read below how to operate into each option.

- Sound Effect** This option allows you to customise the sound effect. After selecting this option press **OK**. Next, press repeatedly **↓** or **↑** to select:
- Natural** Enhances clarity, detail and presence of sound by using "BBE High Definition Sound system"*.
 - Dynamic** "BBE High Definition Sound system"* intensifies clarity and presence of sound for better intelligibility and musical realism.
 - Off** Flat response.
- Once you have selected your desired option, press **OK** to store.
- ⚠** This function has no effect on headphones sound.
-
- Treble** Press **←** or **→** to decrease or to increase higher-frequency sounds. Next, press **OK** to store.
-
- Bass** Press **←** or **→** to decrease or to increase the lower-frequency sounds. Next, press **OK** to store.
-
- Balance** Press **←** or **→** to emphasise the left or the right speaker. Next, press **OK** to store.
-
- Reset** Press **OK** to reset the sound to the factory preset levels.
-
- Dual Sound** Press **→**. Next:
For a Stereo broadcast:
Press **↓** or **↑** to select Stereo or Mono. Next press **OK** to store.
For a bilingual broadcast:
Press **↓** or **↑** to select Mono (for mono channel if available), A (for channel 1) or B (for channel 2). Next press **OK** to store.
-
- Auto Volume** Press **→**. Next press **↓** or **↑** to select On (the volume level of the channels will stay the same, independent of the broadcast signal, e.g. in the case of advertisements) or Off (the volume level changes according to the broadcast signal). Next press **OK** to store.
- ⚠** This function has no effect on headphones sound.

i * The "BBE High Definition Sound system" is manufactured by Sony Corporation under license from BBE Sound, Inc. It is covered by U.S. Patent No. 4,638,258 and No. 4,482,866. The word "BBE" and BBE Symbol are trademarks of BBE Sound, Inc.

The Features Menu

i The "Features" menu allows you to alter various settings of the TV.

To do this:
Press the **MENU** button and press **↓** twice to select **Picture Adjustment**, then press **OK** to enter this menu. Next, press **↓** or **↑** to select the desired option and press **OK**. Finally, read below how to operate into each option.

- POWER SAVING**
This option allows you to reduce the power consumption of this TV.
To do this:
After selecting the option, press **OK**. Then, press **↓** or **↑** to select **Reduce**. Next, press **OK** to store.
-
- AUTO FORMAT**
This option allows you to automatically change the aspect ratio of the screen.
To do this:
After selecting the option, press **OK**. Then, press **↓** or **↑** to select On (if you wish the TV set to automatically switch the screen format according to the broadcast signal) or Off (if you wish to keep your preference). Finally, press **OK** to store.
- i** Even if you have selected "On" or "Off", you can always modify the format of the screen by pressing **⇄** repeatedly on the remote control to select one of the following formats:
- SMART:** Imitation of wide screen effect for 4:3 broadcast. 
 - 4/3:** Conventional 4:3 picture size, full picture information. 
 - 14/9:** Compromise between 4:3 and 16:9 picture size. 
 - ZOOM:** Widescreen format for letterbox movies. 
 - WIDE:** For 16:9 broadcast. Full picture information. 
- i** In "SMART", "ZOOM" and "14/9" modes, parts of the top and bottom of the screen are cut off. Press **↓** or **↑** to adjust the position of the image on the screen (e.g. to read subtitles).
According to the format of diffusion, black bands can always appear whatever the selected mode.

continued...

AV2 OUTPUT

The "AV2 Output" option allows you to select the source to be output from the Scart connector  so that you can record from this Scart the signal coming from the TV or the signal that is being viewed on the TV.

 If your VCR or DVD recorder supports SmartLink, this procedure is not necessary.

To do this:

Once you have entered into the "Features" menu as it is explained in the previous page and after selecting the option, press **OK**. Then press  or  to select the desired output signal:

TV to output the aerial source.

AUTO to output the signal that is being viewed on the TV.

 If you select "AUTO", the output signal will always be the same one that is displayed on the screen. If you have connected a decoder to the Scart  2 or to a VCR connected to this Scart, please remember to change back the "AV2 Output" to "TV" for correct unscrambling. Alternatively, set the "Decoder" option in the "Manual Programme Preset" menu to "On" for the scrambled programme. For more details refer to page 26.

TV SPEAKERS

This option allows you to turn off the TV speakers e.g. to listen to the sound through external audio equipment connected to the TV.

To do this:

Press the  or  buttons to select one of the following options, then press the **OK** button.

On The sound is output from the TV speakers.

One Time Off The TV speakers are temporarily turned off allowing you to listen to the sound from external audio equipment.

 The "TV Speakers" option automatically returns to "On" when the TV set is switched off.

Permanent Off The TV speakers are permanently turned off allowing you to listen to the sound from external audio equipment.

 To turn on the TV speakers again, change the "TV Speakers" option to "On".

RGB CENTER

 This option is only available if an RGB source has been connected to the Scart connector  on the rear of TV.

When viewing an RGB signal, the picture may need some adjusting. This option allows you to adjust the horizontal picture position so that the picture is in the middle of the screen.

To do this:

Once you have entered the "Features" menu as it is explained in on page 21 and while watching an RGB source select the "RGB Center" option and press **OK**. Then press  or  to adjust the centre of the picture between -5 and +5. Finally press **OK** to confirm and store.

The Set Up Menu

 The "Set Up" menu allows you to alter various options on this TV.

To do this:

Press the **MENU** button and press  three times to select , then press **OK** to enter this menu. Next, press  or  to select the desired option and press **OK**. Finally, read below how to operate into each option.

LANGUAGE

This option allows you to select the language that menus are displayed in.

To do this:

After selecting the option, press **OK** and then proceed in the same way as in step 3 of the section "Switching On the TV and Automatically Tuning" on page 15.

COUNTRY

This option allows you to select the country in which you wish to operate the TV set.

To do this:

After selecting the option, press **OK** and then proceed in the same way as in step 4 of the section "Switching On the TV and Automatically Tuning" on page 15.

AUTO TUNING

This option allows you to automatically search for and store all available TV channels.

To do this:

After selecting the option, press **OK** and then proceed in the same way as in the steps 5 and 6 of the section "Switching On the TV and Automatically Tuning" on page 16.

PROGRAMME SORTING

This option allows you to change the order in which the channels (TV Broadcast) appear on the screen.

To do this:

After selecting the option, press **OK** and then proceed in the same way as in the step 7 of the section "Switching On the TV and Automatically Tuning" on page 16.

PROGRAMME LABELS

This option allows you to name a channel using up to five characters (letters or numbers).

To do this:

- Once you have entered the "Set Up" menu as it is explained in the previous page and after selecting this option, press **OK**, then press **↓** or **↑** to select the programme number with the channel you wish to name. Next press **OK**.
- With the first element of the Label column highlighted, press **OK** and **↓**, **↑**, **←** or **→** to select the letter, next press **OK**.
When you have finished, press **↓**, **↑**, **←** or **→** to select the word "End" on the screen and finally press **OK** to turn off the menu from the screen.

- i** To correct a letter, select "**←**" on the screen to go back and press **OK**.
For a blank, select "**□**" on the screen and press **OK**.

AV PRESET

This option allows you to:

- Designate a name to the external equipment you have connected to the input sockets of the TV set.

To do this:

- Once you have entered the "Set Up" menu as it is explained in the previous page and after selecting this option, press **OK**, then press **↓** or **↑** to select the input source you wish to name: AV1 and AV2 for the rear Scarts and AV3 for side connectors. Next press **OK** twice.
- A label automatically appears in the label column:
 - If you want to use one of the predefined labels, press **↓** or **↑** to select the desired label and finally press **OK**.

i The total predefined labels are: VIDEO, DVD, CABLE, GAME, CAM (camcorder) or SAT (satellite).
 - If you want to set a different label, select Edit and press **OK**. Then, with the first element highlighted, press **↓**, **↑**, **←** or **→** to select the letter, next press **OK**. When you have finished, press **↓**, **↑**, **←** or **→** to select the word "End" on the screen and finally press **OK** to turn off the menu from the screen.

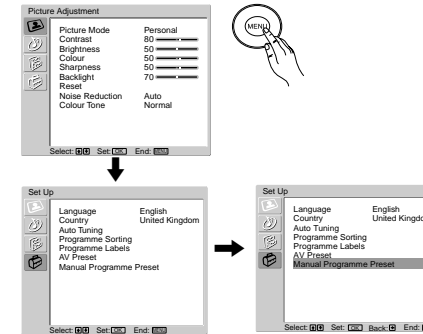

- i** To correct the letter, select "**←**" on the screen to go back and press **OK**.
For a blank, select "**□**" on the screen and press **OK**.

- Change the input sound level of the optional equipment connected.

To do this:

Once you have entered the "Set Up" menu as it is explained in the previous page and after selecting this option press **OK**, then press **↓** or **↑** to select the input source you want to alter the input sound level: AV1 and AV2 for the rear Scarts and AV3 for side connectors. Next press twice **→** to highlight the Sound Offset column. Finally press **OK** and **↓** or **↑** to alter the input sound level between -9 and +9.

The Manual Programme Preset Menu

- i** The "Manual Programme Preset" option in the "Set Up" menu allows you to manually tune individual channels.

To do this:

Press the **MENU** button and press **↓** three times to select **□**, then press **OK** to enter the "Set Up" menu. Next, press **↓** or **↑** to select "Manual Programme Preset" and press **OK**. Finally, read below how to operate into each option.

The Manual Programme Preset option allows you to:

- Preset channels or the VCR channel one by one to the programme order of your choice.

To do this:

- Once you have entered the "Set Up" menu as it is explained on page 23 and after selecting the "Manual Programme Preset" option, press **OK**. Next with Programme option highlighted press **OK**. Press **↓** or **↑** to select which programme number you want to preset the channel on (for VCR, select programme number "0"). Then press **←**.
- i** The following option is only available depending on the country you have selected in the "Country" menu.
After selecting the System option, press **OK**. Then press **↓** or **↑** to select the TV Broadcast system (B/G for western European countries, D/K for eastern European countries, L for France or I for United Kingdom). Then press **←**.
- After selecting the Channel option, press **OK**. Next press **↓** or **↑** to select the channel tuning ("C" for terrestrial channels or "S" for cable channels). Then press the number buttons to enter directly the channel number of the TV Broadcast or the channel of the VCR signal. If you do not know the channel number, press **→** and **↓** or **↑** to search for it. When you have tuned the desired channel, press **OK** twice to store.

Repeat all the above steps to tune and store more channels.

- Label a channel using up to five characters.

To do this:

Once you have entered the "Set Up" menu as it is explained on page 23 and after selecting the "Manual Programme Preset" option, press **OK**. Next with the Programme option, highlighted press the **PROG +/-** button to select the programme number with the channel you wish to name. When the programme you want to name appears on the screen, press **↓** or **↑** to select the Label option and press **OK**. Then, with the first element highlighted, press **↓**, **↑**, **←** or **→** to select the letter, next press **OK**. When you have finished, press **↓**, **↑**, **←** or **→** to select the word "End" on the screen and finally press **OK** to turn off the menu from the screen. Finally press **OK** to store.

- i** To correct a letter, select "**←**" on the screen to go back and press **OK**.
For a blank, select "**□**" on the screen and press **OK**.

- c) Fine tune the broadcast reception. Normally the automatic fine tuning (AFT) will give the best possible picture, however you can manually fine tune the TV to obtain a better picture reception in case the picture is distorted.

To do this:

While watching the channel (TV Broadcast) you wish to fine tune, and once you have entered the "Set Up" menu as it is explained on page 23 and after selecting the "Manual Programme" option, press **OK**. Then press **↓** or **↑** to select the AFT option and press **➡**. Next press **↓** or **↑** to adjust the fine tuning between -15 and +15. Finally press **OK** twice to store.

- d) Improve the sound for individual channels in the case of distortion in mono broadcasts. (Not available when "System" is set to "L".)

Sometimes a non standard broadcast signal can cause sound distortion or intermittent sound muting when watching mono programmes. The Audio Filter option allows you to reduce this effect.

- ❶ If you do not experience any sound distortion, we recommend that you leave the Audio Filter option set to the default setting of "Off".

To do this:

Once you have entered the "Set Up" menu as it is explained on page 23 and after selecting the "Manual Programme Preset" option, press **OK**. Next, press **↓** or **↑** to select the Audio Filter option and press **➡**. Next press **↓** or **↑** to select Off, Low or High.

- ❶ You can not receive stereo or dual sound when "Low" or "High" is selected.

- e) Skip any unwanted programme numbers when they are selected with the **PROG +/-** buttons.

To do this:

Once you have entered the "Set Up" menu as it is explained on page 23 and after selecting the "Manual Programme Preset" option, press **OK**. Next with the Programme option highlighted, press the **PROG +/-** button to select the programme number you want to skip. When the programme you want to skip appears on the screen, press **↓** or **↑** to select the Skip option and press **➡**. Next press **↓** or **↑** to select On. Finally press **OK** twice to confirm and store.

To cancel this function afterwards, select "Off" instead of "On" in the step above.

- f) View and record scrambled channels (e.g. from a pay TV decoder) when using a decoder connected to Scart **↔2/↔** directly or through a VCR.

- ❶ This option is only available depending on the country you have selected in the "Country" menu.

To do this:

Once you have entered the "Set Up" menu as it is explained on page 23 and after selecting the "Manual Programme Preset" option, press **OK**. Next press **↓** or **↑** to select the Decoder option and press **➡**. Next press **↓** or **↑** to select On. Finally press **OK** twice to confirm and store.

To cancel this function afterwards, select "Off" instead of "On" in the step above.

Other Functions

Sleep Timer

This function allows you to set the TV to switch itself automatically to standby mode after a specified time period. The following time periods can be selected: 30, 60, 90 and 120 minutes.

To do this:

Press the **⏸** button on the remote control repeatedly until the desired time period appears on the screen.

When the Sleep Timer feature is on, the **⏸** (Standby/Sleep) indicator on the TV lights up in red.

To cancel the Sleep Timer feature:

Press the **⏸** button on the remote control repeatedly until "Off" appears on the screen.

If you switch off the TV and switch it on again, the Sleep Timer feature is reset to "Off".

Press the **⏸** button on the remote control to display the time remaining before the TV switches to standby mode.

The message "Sleep Timer will end soon. Power will be turned off." Appears on the screen 1 minute before the TV switches to the standby mode.

Picture Freeze

This function allows you to freeze the TV picture (e.g. to make a note of a telephone number or recipe).

To do this:

Press the **⏸** button on the remote control to freeze the picture. A window is displayed in the bottom left of the screen showing the currently selected channel. Press the **⏸** button again to remove the window. Press the **⏸** button again to cancel the Picture Freeze and return to normal TV mode.

Adjusting the position of the Picture Freeze window

The position of the window displaying the currently selected channel can be adjusted.

To do this

With the TV in Picture Freeze mode, press the **←**, **→**, **↓** or **↑** buttons to adjust the position of the window on the TV screen.

Teletext

Teletext is an information service transmitted by most TV stations. The index page of the Teletext service (usually page 100) gives you information on how to use the service. To operate Teletext, use the remote control buttons as indicated below.

Make sure you use a channel (TV Broadcast) with a strong signal, otherwise Teletext errors may occur.

To switch on Teletext

After selecting the TV channel which carries the Teletext service you want to view, press .

Each time you press , the screen changes cyclically as follows:

Teletext mode Teletext Superimpose mode \rightarrow TV mode \rightarrow Teletext mode \rightarrow (repeat).

To select a Teletext page

Input three digits for the page number, using the number buttons.

If you make a mistake, retype the correct page number.

If the counter on the screen continues searching, it is because this page is not available. In this case, input another page number.

To access the next or preceding page

Press **PROG +** () or **PROG -** () .

To freeze a Teletext page

Some Teletext pages have sub-pages which follow on automatically. To stop them, press (). Press it again to cancel the freeze.

To reveal concealed information (e.g. answers to a quiz)

Press (). Press it again to conceal the information.

To change brightness of Teletext:

Whilst you are viewing Teletext, press repeatedly to choose between four different options of brightness.

To switch off Teletext

Press .

If wrong Teletext characters appear for Cyrillic languages, we recommend you set the "Language" option in the "Set Up" menu to "Russia" if your country does not appear in the list. For details, refer to page 23.

Fastext

The Fastext service lets you access pages with one push of a button. Whilst you are in the Teletext mode and Fastext is broadcast, a colour coded menu appears at the bottom of the Teletext page. Press the colour button (red, green, yellow or blue) to access the corresponding page.

Additional Information

Connecting Equipment to the TV

Using the following instructions you can connect a wide range of optional equipment to your TV set. Connecting cables are not supplied.

continued...

Connecting a VCR

To connect a VCR, please refer to the section "Connecting the aerial and VCR" of this instruction manual on page 14.

Connecting a VCR or a DVD recorder that supports SmartLink

 SmartLink is a direct link between the TV set and a SmartLink compatible VCR/DVD recorder. For more information on SmartLink, please refer to the instruction manual of your SmartLink VCR/DVD recorder.

If you use a VCR or a DVD recorder that supports SmartLink, please connect the VCR or the DVD recorder to the TV using a Scart lead to the Scart   .

If you have connected a decoder or a Set Top Box to the Scart or through a VCR connected to this Scart

Select the "Manual Programme Preset" option in the "Set Up" menu and after entering in the "Decoder**" option, select "On" (refer to page 26). Repeat this option for each scrambled signal.

**This option is only available depending on the country you have selected in the "Country" menu.

Connecting Audio Equipment to the TV

To listen to the sound from TV on Hi-fi equipment.

Connect your audio equipment to the audio output sockets  if you wish to amplify the audio output from the TV. Next, using the menu system, select the "Features" menu and set the "TV Speakers" to "Permanent Off" (see page 22).

 The volume of the external speakers can be altered by pressing the volume buttons on the TV remote control. The treble and bass setting can also be altered through the "Sound Adjustment" menu (see page 20).

Viewing pictures from equipment connected to the TV

- 1 Connect your equipment to the designated TV socket, as indicated on page 29.
- 2 Switch on the connected equipment.
- 3 To watch the picture from the connected equipment, press the  /  button repeatedly until the correct input symbol appears on the screen.

Symbol Input Signals

- | Symbol | Input Signals |
|---|---|
|  1 | Audio / video input signal through the Scart connector  |
|  1 | RGB input signal through the Scart connector  . This symbol appears only if an RGB source has been connected. |
|  2 | Audio/video input signal through the Scart connector  |
|  2 | S Video Input signal through the Scart connector  . This symbol appears only if an S Video source has been connected. |
|  3 | Video input signal through the phono socket  and Audio input signal through  . |
|  3 | S Video Input signal through the side S Video input jack  and Audio signal through  . This symbol appears only if an S Video source has been connected. |

- 4 Press the  button on the remote control to return to the normal TV picture.

For Mono Equipment

Connect the phono plug to the L/G/S/1 socket on the side of the TV and select  or  input signal using the instructions above. Next, refer to the "Sound Adjustment" section of this manual and set "Dual Sound" option to "A" on the sound menu screen (see page 20).

Technical Specifications

Panel System:

LCD (Liquid Crystal Display) Panel

TV System:

(Depending on the Country/region selection)
B/G/H, D/K, L, I

Colour System:

PAL, SECAM
NTSC 3.58, 4.43 (Only Video In)

Aerial:

75 ohm external terminal for VHF/UHF

Channel Coverage:

(Depending on the Country/region selection)

VHF: E2-E12
UHF: E21-E69
CATV: S1-S20
HYPER: S21-S41
D/K: R1-R12, R21-R69
L: F2-F10, B-Q, F21-F69
I: UHF B21-B69

Screen Size:

27 Inches (approx. 68 cm. measured diagonally)

Display Resolution:

1280 dots (horizontal) x 720 lines (vertical)

Power Requirement:

220-240V AC; 50/60 Hz

Power Consumption:

110 W

Standby Power Consumption:

0.7 W

Sound Output:

10 W + 10 W

Dimensions (w x h x d):

With stand, approx. 698 x 574 x 245 mm.

Without stand, approx. 504 x 526 x 119 mm.

Weight:

With stand, approx. 14 Kg.

Without stand, approx. 12 Kg.

Rear Terminals:

AV1:  1/  1

21-pin Scart connector (CENELEC standard) including audio/video input, RGB input, TV audio/video output.

AV2:  2/  2 (SMARTLINK)

21-pin Scart connector (CENELEC standard) including audio/video input, S video input, selectable audio/video output and Smartlink interface.

 Audio Outputs (left/right) – phono jacks.

 Aerial connector (RF In)

Side Terminals:

AV3:

 3 S video input (4-pin mini DIN)

 3 Video input (phono jack)

 3 Audio input (phono jacks)

 headphones jack

Accessories supplied:

One Remote Control (RM-Y1108),

Two Size AA batteries (R6 type),

One Mains lead (Type C-6)

Optional Accessory:

Wall-Mount Bracket SU-LW1.

TV Stand SU-PG100.

Other Features:

Teletext, Fastext, TOPtext (depending on availability)

Sleep Timer

Picture Freeze

Smartlink (Direct link between your TV and a compatible VCR or DVD recorder. For more information on Smartlink, please refer to the instruction manual of your VCR or DVD recorder.)

TV system autodetection

This TV is compatible with the VESA universal wall stand system.

Design and specifications are subject to change without notice.

**This instruction manual has been printed on:
Ecological Paper - Totally Chlorine Free **

Troubleshooting

 Here are some simple solutions to problems which may affect the picture and sound.

Problem	Possible solution
No picture	
No picture (screen is dark) and no sound.	Check the aerial connection. Connect the TV to the mains, and press the  power switch on the top side of the TV set. If the  (standby) indicator is on, press TV  on the remote control.
The TV turns off automatically. (The TV enters the standby mode.)	Check if the Sleep Timer is activated (page 27).
No picture or no menu information from equipment connected to the Scart connector.	Check that the optional equipment is on and press the  /  button repeatedly on the remote control until the correct input symbol is displayed on the screen (page 31). Check the connection between the optional equipment and the TV.
Poor picture/Unstable picture	
Double images or ghosting.	Check aerial/cable connections. Check the aerial location and direction.
Only snow and noise appears on the screen.	Check if the aerial is broken or bent. Check if the aerial has reached the end of its serviceable life (3-5 years in normal use, 1-2 years at the seaside)
Dotted lines or stripes.	Keep the TV away from electrical noise sources such as cars, motorcycles, or hair-dryers.
No colour on colour programmes.	Using the menu system, select the "Picture Adjustment" menu and select "Reset" to return to the factory settings (page 19). If you set the "Power Saving" function to "Reduce," picture colours may become dimmer (page 21).
Some tiny black points and/or bright points on the screen.	The picture of the display is composed of pixels. Tiny black points and/or bright points (pixels) on the screen, do not indicate a malfunction.
The picture is too bright.	Using the menu system, select the "Picture Adjustment" menu and select "Picture Mode" Then select the desired picture mode (page 18).
Picture (stripe) noise.	Make sure that the aerial is connected. Keep the aerial cable away from other connecting cords. Do not use 300-ohm twin lead cables as interference may occur.

continued...

Problem	Possible solution
Stripe noise during playback/recording of a VCR.	Video head interference. Keep your VCR away from the TV. Leave a space of 30 cm between your VCR and the TV set to avoid noise. Avoid installing your VCR in front or at the side of the TV set.
Poor or no picture (screen is dark), but good sound.	Using the menu system, select the "Picture Adjustment" menu and select "Reset" to return to the factory settings (page 19).
Noisy picture when viewing a TV channel.	Using the menu system, select the "Manual Programme Preset" option in the "Set Up" menu and adjust Fine Tuning (AFT) to obtain better picture reception (page 26). Using the menu system, set the "Noise Reduction" option in the "Picture Adjustment" menu to reduce the noise in the picture (page 19).
Distorted picture when changing programmes or selecting teletext.	Turn off any equipment connected to the Scart connector on the rear of the TV set.
Cannot operate the menu	If the item you want to select appears in a pale colour is because you cannot select it.
Wrong characters appear when viewing teletext	Using the menu system, enter the "Country" option in the "Set Up" menu and select the country in which you operate the TV set (page 23).
No sound/Noisy sound	
Good picture, no sound.	Press the \triangleleft +/- or M (mute) on the remote control. Check that "TV Speakers" option is set to "On" in the "Features" menu (page 22).
Audio noise.	Make sure that the aerial is connected. Keep the aerial cable away from other connecting cables. Do not use 300-ohm twin lead cables as interference may occur. Communication problems may occur if the infrared communication equipment (e.g. infrared cordless headphones) is used near the TV. Please use headphones other than infrared cordless headphones, move the infrared transceiver away from the TV until the noise is eliminated, or move the transmitter and receiver of the infrared communication equipment closer together. Using the menu system, select "Audio Filter" from the "Manual Programme Preset" menu. Next select "Low" or "High" (see page 26).
Unable to receive a stereo or dual sound broadcast	Check that the "Audio Filter" option in the "Manual Programme Preset" menu is set to "Off". (see page 26).

Problem	Possible solution
Strange sound	
The TV cabinet creaks.	Changes in room temperature sometimes causes the TV cabinet to expand or contract, which can make slight noises. This does not indicate a malfunction.
The TV buzzes.	There might be a surge sound when turning on the TV. This does not indicate a malfunction.
Remote Control Remote control does not function.	Replace the batteries.
The O (standby) or TV I (power on) indicators on the TV flashes	Contact your nearest Sony service centre.

If you continue to experience problems, have your TV serviced by qualified personnel.
Never open the casing yourself.

SECTION 2 DISASSEMBLY

2-1. REAR CABINET ASSEMBLY REMOVAL

2-2. REAR COVER REMOVAL

2-3. A BOARD REMOVAL

2-4. G2 BOARD REMOVAL

2-5. H1 BOARD REMOVAL

2-6. H2 BOARD REMOVAL

2-7. H3 BOARD REMOVAL

2-8. H5 BOARD REMOVAL

2-9. LCD BRACKET REMOVAL

2-10. LCD ASSEMBLY REMOVAL

SECTION 3 SET-UP ADJUSTMENTS

3-1. Signal Adjustment

Service adjustments to this model can be performed using the supplied remote Commander RM-Y1108.

How to enter into the Service Mode

1. Turn on the power to the TV set and enter into the stand-by mode.
2. Press the following sequence of buttons on the Remote Commander.

'TT—' will appear in the upper right corner of the screen. Other status information will also be displayed.

3. Press 'MENU' on the remote commander to obtain the following menu on the screen.

```

TRIDENT PANEL TV
CHROMA DECODER
BACKLIGHT
SOUND
IF ADJUST
SERVICE MENU
ERROR MENU

WA1 v0.29
FACTORY DATA FFh FFh
SERIAL NUMBER : 4294967295
    
```

4. Move to the corresponding adjustment item using the up or down arrow buttons on the Remote Commander.
5. Press the right arrow button to enter into the required menu item.
6. Press the 'Menu' button on the Remote Commander to quit the Service Mode when all adjustments have been completed.

Note :

- After carrying out the service adjustments, to prevent the customer accessing the 'Service Menu' switch the TV set OFF and then ON.

3-1-1.PAL auto adjustment (CVBS)

1. Select AV1 and input PAL signal. (PAL CVBS: CB 75%Y/75%C from signal generator).
2. Change the TV to Personal Mode and set the following registers.

Contrast - 90
Brightness - 50
Colour - 50

3. Set the TV in Service Mode (See above) and send "TT51" command.

3-1-2.PAL auto adjustment (RGB)

1. Select AV1 and input RGB signal. (PAL RGB: CB 100%Y/75%C from signal generator).
2. Change the TV to Personal Mode and set the following registers.

Contrast - 90
Brightness - 50
Colour - 50

3. Set the TV in Service Mode (See above) and send "TT52" command.

3-1-3.SECAM auto adjustment (CVBS)

1. Select AV1 and input SECAM signal. (SECAM CVBS: CB 75%Y/75%C from signal generator).
2. Change the TV to Personal Mode and set the following registers.

Contrast - 90
Brightness - 50
Colour - 50

3. Set the TV in Service Mode (See above) and send "TT53" command.

Note :

- While Auto adjustment is in process the RED LED is ON, till it finishes.

3-2. White Balance Adjustment

3-2-1. White Balance adjustment (H/L)

1. Select AV1.
2. Change the TV to Personal Mode and set the following registers.

Contrast - Max
Brightness - 50
Colour - 50
Backlight - Max

3. Input PAL CVBS 70 IRE Full Field Signal to AV1.
4. Enter the 'SERVICE MENU' using the cursor keys on the remote commander.
5. Adjust Highlight registers:

NORMAL_PAL_RD (R Drive)
NORMAL_PAL_BD (B Drive)

High light adjustment value (10500K-6MPCD)

	KLV-27HR3	range
x	0.2798	0.8JND
y	0.2823	
Y	-	N/A

3-2-2. White Balance adjustment (C/O)

1. Select AV1.
2. Change the TV to Personal Mode and set the following registers.

Contrast - Max
 Brightness - 50
 Colour - 50
 Backlight - Max

3. Input PAL CVBS 20 IRE Full Field Signal to AV1.
4. Enter the 'SERVICE MENU' using the cursor keys on the remote commander.
5. Adjust CutOff registers:

NORMAL_PAL_RC (R cutoff)
 NORMAL_PAL_BC (B cutoff)

Low light (Cut Off) adjustment value (10500K-6MPCD)

	KLV-27HR3	range
x	0.2798	0.8JND
y	0.2823	
Y	-	N/A

3-2-3. Secam White Balance adjustment (C/O)

1. Select AV1.
2. Change the TV to Personal Mode and set the following registers.

Contrast - Max
 Brightness - 50
 Colour - 50
 Backlight - Max

3. Input SECAM CVBS 20 IRE Full Field Signal to AV1.
4. Enter the 'SERVICE MENU' using the cursor keys on the remote commander.
5. Adjust CutOff registers:

SECAM_OFFSET_RC (R cutoff)
 SECAM_OFFSET_BC (B cutoff)

Low light (Cut Off) adjustment value (10500K-6MPCD)

	KLV-27HR3	range
x	0.2760	0.8JND
y	0.2710	
Y	-	N/A

3-3. TEST TEST MODE

Test Test Mode is available in Service Mode, OSD 'TT' appears. The functions described below are available by selecting the two numbers. To release 'Test Test mode', press 00 or switch the TV set into Stand-by mode.

00	'TT' mode off
01	Picture maximum
02	Picture minimum
03	Set Volume to 35%
04	Set Volume to 50%
05	Set Volume to 65%
06	Set Volume to 80%
07	Ageing mode
08	Shipping Condition
16	Picture level 50%
19	Factory Mode toggle (on/off)
25	AEP Destination
27	CBA mode toggle (ON/OFF)
41	Re-initialise NVM
43	Select Dual Sound A
44	Select Dual Sound B
45	Select Dual Sound Mono
46	Select Dual Sound Stereo
48	Set NVM as non-virgin
49	Set NVM as virgin
51	LCD Auto adjustment Pal
52	LCD Auto adjustment RGB
53	LCD Auto adjustment Secam
63	AM from baseband (AFRIC dem) or from RF (MSP dem)
67	MSP Auto Carrier Mute function enable/disable
75	Balance to center position
76	Volume maximum
77	Volume minimum
78	Balance full left
79	Balance full right
81	Set 14:9 zoom mode
82	Set Smart zoom mode
83	Set Wide mode
84	Set Zoom mode
85	Set 4:3 mode
87	Local keys test
93	Set 20" settings
94	Set 17" settings
95	Set 30" settings
96	Set 27" settings
97	Freeze key
99	Display Error and Working Time menu

SECTION 5 EXPLODED VIEWS

NOTE :

- Items with no part number and no description are not stocked because they are seldom required for routine service.
- The construction parts of an assembled part are indicated with a collation number in the remarks column.
- Items marked “*” are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

TRACE

A new TV Repair Assistance Tool that combines ease of use and powerful PC software tools to allow you to save valuable time during many TV repairs.

The TRACE interface connects to the PC's serial port. It provides connection to the TV's I²C bus and can be provided with an InfraRed transmitter (optional).

The interface is powered by a standard 9 V PP3 battery for portable use, and can also be powered by an external 9V/25mA DC power supply.

The TRACE software that is supplied with the interface allows you to:

- Read, restore and compare NVM contents via the I²C bus
- Acknowledge check of all I²C devices in the TV set
- Read Error Codes (emulation of the Error Reader tool)

With the optional IR Add-on kit, the following features can be added:

- Remote Commander emulation
- User programmable Functional Check through Infrared
- Fast and documented Test Mode setting of all Sony TV chassis

Additional features such as Adjustments and Troubleshooting are available in chassis-dependent software modules. Please contact your local Sony Service organisation for the latest information.

Note: For workshops already using the existing I²C Link parallel port interface (9-948-320-30), this software can be used as well, replacing the TV Data Handling software (9-948-340-50), but Error Reader and IR functions can only be accessed with the TRACE interface.

Partnumbers: TRACE Starter Kit (TRACE interface + software): 9-948-320-70
TRACE Software (for users of the I²C Link interface): 9-948-340-80
TRACE IR Add-on (IR interface + Remote Commander software): 9-948-320-80

PC requirements: IBM-compatible PC with operating system Windows95, Windows98, or WindowsNT*.

* WindowsNT only supported with TRACE interface

Happy Repairing!!

Highly Recommended Repair Ebook:

If you're a LCD Monitor repairer, then this is the best guide for you. Why? Because, the author revealed all his LCD Monitor Repairing secrets for you. I think, with just few Repair tips you learned from this guide you will get back your investment!

[Click Here to read](#) more.

This eBook will show you how to test the electronic component correctly and accurately. Some of you may say that I don't need this eBook because it is too simple! Do you know that, in fact there is lots of testing electronic components secrets I have learned from this guide? Do you know how to test a 'TRIAC' correctly and accurately? If you answer no then I guess you have to get this eBook. [Click Here to read more.](#)

Are you tired of searching the service manuals to look for the value of a burnt resistor? If the answer is YES, then this eBook is a 'must have' guide for you. You can save a lot of time and be able to repair customer's Electronic equipment with burnt resistors in it.
