## VSX-918V-S

## VSX-818V-K

## VSX-818V-S

**THIS MANUAL IS APPLICABLE TO THE FOLLOWING MODEL(S) AND TYPE(S).**

Model	Type	Power Requirement	Remarks
VSX-918V-K	MYSXJ5	AC 220 V to 230 V	
VSX-918V-S	MYSXJ5	AC 220 V to 230 V	
VSX-818V-K	MYSXJ5	AC 220 V to 230 V	
VSX-818V-S	MYSXJ5	AC 220 V to 230 V	

For details, refer to "Important Check Points for good servicing".

# SAFETY INFORMATION

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual.

Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

## WARNING

This product contains lead in solder and certain electrical parts contain chemicals which are known to the state of California to cause cancer, birth defects or other reproductive harm.

Health & Safety Code Section 25249.6 Proposition 65

## NOTICE

(FOR CANADIAN MODEL ONLY)

Fuse symbols  (fast operating fuse) and/or  (slow operating fuse) on PCB indicate that replacement parts must be of identical designation.

## REMARQUE

(POUR MODÈLE CANADIEN SEULEMENT)

Les symboles de fusible  (fusible de type rapide) et/ou  (fusible de type lent) sur CCI indiquent que les pièces de remplacement doivent avoir la même désignation.

## (FOR USA MODEL ONLY)

### 1. SAFETY PRECAUTIONS

The following check should be performed for the continued protection of the customer and service technician.

#### LEAKAGE CURRENT CHECK

Measure leakage current to a known earth ground (water pipe, conduit, etc.) by connecting a leakage current tester such as Simpson Model 229-2 or equivalent between the earth ground and all exposed metal parts of the appliance (input/output terminals, screwheads, metal overlays, control shaft, etc.). Plug the AC line cord of the appliance directly into a 120V AC 60 Hz outlet and turn the AC power switch on. Any current measured must not exceed 0.5 mA.

AC Leakage Test

**ANY MEASUREMENTS NOT WITHIN THE LIMITS OUTLINED ABOVE ARE INDICATIVE OF A POTENTIAL SHOCK HAZARD AND MUST BE CORRECTED BEFORE RETURNING THE APPLIANCE TO THE CUSTOMER.**

### 2. PRODUCT SAFETY NOTICE

Many electrical and mechanical parts in the appliance have special safety related characteristics. These are often not evident from visual inspection nor the protection afforded by them necessarily can be obtained by using replacement components rated for voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in this Service Manual.

Electrical components having such features are identified by marking with a  on the schematics and on the parts list in this Service Manual.

The use of a substitute replacement component which does not have the same safety characteristics as the PIONEER recommended replacement one, shown in the parts list in this Service Manual, may create shock, fire, or other hazards.

Product Safety is continuously under review and new instructions are issued from time to time. For the latest information, always consult the current PIONEER Service Manual. A subscription to, or additional copies of, PIONEER Service Manual may be obtained at a nominal charge from PIONEER.

## [Important Check Points for Good Servicing]

In this manual, procedures that must be performed during repairs are marked with the below symbol. Please be sure to confirm and follow these procedures.

### 1. Product safety

Please conform to product regulations (such as safety and radiation regulations), and maintain a safe servicing environment by following the safety instructions described in this manual.

- ① Use specified parts for repair.

Use genuine parts. Be sure to use important parts for safety.

- ② Do not perform modifications without proper instructions.

Please follow the specified safety methods when modification (addition/change of parts) is required due to interferences such as radio/TV interference and foreign noise.

- ③ Make sure the soldering of repaired locations is properly performed.

When you solder while repairing, please be sure that there are no cold solder and other debris. Soldering should be finished with the proper quantity. (Refer to the example)

- ④ Make sure the screws are tightly fastened.

Please be sure that all screws are fastened, and that there are no loose screws.

- ⑤ Make sure each connectors are correctly inserted.

Please be sure that all connectors are inserted, and that there are no imperfect insertion.

- ⑥ Make sure the wiring cables are set to their original state.

Please replace the wiring and cables to the original state after repairs. In addition, be sure that there are no pinched wires, etc.

- ⑦ Make sure screws and soldering scraps do not remain inside the product.

Please check that neither solder debris nor screws remain inside the product.

- ⑧ There should be no semi-broken wires, scratches, melting, etc. on the coating of the power cord.

Damaged power cords may lead to fire accidents, so please be sure that there are no damages. If you find a damaged power cord, please exchange it with a suitable one.

- ⑨ There should be no spark traces or similar marks on the power plug.

When spark traces or similar marks are found on the power supply plug, please check the connection and advise on secure connections and suitable usage. Please exchange the power cord if necessary.

- ⑩ Safe environment should be secured during servicing.

When you perform repairs, please pay attention to static electricity, furniture, household articles, etc. in order to prevent injuries. Please pay attention to your surroundings and repair safely.

### 2. Adjustments

To keep the original performance of the products, optimum adjustments and confirmation of characteristics within specification. Adjustments should be performed in accordance with the procedures/instructions described in this manual.

### 3. Lubricants, Glues, and Replacement parts

Use grease and adhesives that are equal to the specified substance. Make sure the proper amount is applied.

### 4. Cleaning

For parts that require cleaning, such as optical pickups, tape deck heads, lenses and mirrors used in projection monitors, proper cleaning should be performed to restore their performances.

### 5. Shipping mode and Shipping screws

To protect products from damages or failures during transit, the shipping mode should be set or the shipping screws should be installed before shipment. Please be sure to follow this method especially if it is specified in this manual.

# 1. SERVICE PRECAUTIONS

## 1.1 NOTES ON SOLDERING

- For environmental protection, lead-free solder is used on the printed circuit boards mounted in this unit.  
Be sure to use lead-free solder and a soldering iron that can meet specifications for use with lead-free solders for repairs accompanied by reworking of soldering.
- Compared with conventional eutectic solders, lead-free solders have higher melting points, by approximately 40 °C. Therefore, for lead-free soldering, the tip temperature of a soldering iron must be set to around 373 °C in general, although the temperature depends on the heat capacity of the PC board on which reworking is required and the weight of the tip of the soldering iron.

Do NOT use a soldering iron whose tip temperature cannot be controlled.

Compared with eutectic solders, lead-free solders have higher bond strengths but slower wetting times and higher melting temperatures (hard to melt/easy to harden).

The following lead-free solders are available as service parts:

- Parts numbers of lead-free solder:  
GYP1006 1.0 in dia.  
GYP1007 0.6 in dia.  
GYP1008 0.3 in dia.

## 1.2 AMPLIFIER FAILURE DIAGNOSIS FLOW CHART

### ■ Amplifier failure diagnosis flow chart

When DC detection is activated ("AMP\_ERR" flashes on the display), failure (damage) of the power amplifier section is considered.

#### Caution:

**When releasing the lock state of power key before repair, please be careful because there is the possibility that more damages will occur when turning on the power once again!**

- According to a symptom, perform the following confirmation beforehand.
  - 1) Are there any Fuses and IC protectors open?  
↓
  - 2) After turn on the power, confirm that the supply voltage of the point that can be measured is appropriate. (Particularly the supply voltage of the power Tr and drive step)  
↓
  - 3) Whether the voltage of pin2 and pin5 of IC601 or IC603 is equal to (VL-0.7V). If not (eg, equal to VH), then change the corresponding power pack IC601 or IC603.  
↓
  - 4) Furthermore, check the output DC voltage of each channel of power pack IC601 and IC603 to limit the failure channel and identify the defect power pack.  
↓
- After identify the failure channel, check that each part is not damaged (resistor, diode... etc. value / open / short)

# 2. SPECIFICATIONS

## 2.1 SPECIFICATIONS

- A Amplifier section**

FM wire antenna (ADH7030)

Microphone (for Auto MCACC setup) (APM7008)

AA size IEC R6 Dry cell batteries (x2)

Remote control (VSX-918V-K : XXD3166)  
(VSX-918V-S : XXD3167)  
(VSX-818V-K : XXD3166)  
(VSX-818K-S : XXD3167)

## 2.2 PANEL FACILITIES

### Front panel

Illustration shows the VSX-918V model

1 **STANDBY/ON**

2 **INPUT SELECTOR dial**  
Selects an input source.

3 **Input select buttons**  
Selects an input source.

4 **Digital Precision Processing indicator**  
(VSX-918V model only)  
Lights to indicate digital processing.

5 **Character display**

6 **MCACC indicator**  
Lights when Acoustic Calibration EQ is on (Acoustic Calibration EQ is automatically set to **ALL CH ADJUST** after the Auto MCACC Setup or EQ Auto Setup).

7 **MASTER VOLUME dial**

8 **AUDIO/VIDEO input**

9 **iPod DIRECT USB terminal**  
Use to connect your Apple iPod as an audio source, or connect a USB audio device for playback.

10 **MCACC PORTABLE jack**

Use to connect a microphone when performing Auto MCACC setup, or connect an auxiliary component using a stereo mini-jack cable.

11 **PHONES jack**

Use to connect headphones (when connected, there is no sound output from the speakers (except speaker system B connections)).

12 **ST +/-**

Use to select preset radio stations.

13 **TUNE +/-**

Used to find radio frequencies.

14 **SOUND RETRIEVER**

Press to restore CD quality sound to compressed audio sources.

15 **VSB MODE**

Press to switch on/off Virtual Surround Back (VSB) mode.

16 **SPEAKERS**

Use to change the speaker system and the impedance setting.

17 **SIGNAL SELECT**

Selects an input signal.

**18 PHASE CONTROL**

Press to switch on/off Phase Control.

**19 ACOUSTIC EQ**

Press to select an Acoustic Calibration EQ setting.

**20 Listening mode buttons**

**AUTO SURR/STREAM DIRECT**

Switches between Auto surround mode (Auto playback on) and Stream Direct playback. Stream Direct playback bypasses the tone controls for the most accurate reproduction of a source.

**STEREO/A.L.C.**

Switches between stereo playback, Auto level control stereo mode and Front Stage Surround Advance modes.

**STANDARD**

Press for Standard decoding and to switch between the various **PRO LOGIC II** options.

**ADVANCED SURROUND**

Switches between the various surround modes.

VSX-918V

## Display

### 1 SIGNAL indicators

Lights to indicate the type of input signal:

#### AUTO

Lights when **AUTO** signal select is on.

#### DIGITAL

Lights when a digital audio signal is detected.

#### □□ DIGITAL

Lights when a Dolby Digital encoded signal is detected.

#### ANALOG

Lights when an analog signal is detected.

#### DTS

Lights when a source with DTS encoded audio signals is detected.

### 2

Lights to indicate decoding of a DTS multichannel signal.

### 3

Lights to indicate decoding of a Dolby Digital multichannel signal.

### 4

Lights to indicate Pro Logic II decoding.

### 5 VIR. SB

Lights during Virtual surround back processing.

### 6 DIRECT

Lights when source Stream Direct playback is in use. Direct playback bypasses the tone controls for the most accurate reproduction of a source.

### 7 AUTO SURR.

Lights when the Auto Surround feature is switched on.

### 8 ATT

Lights when **ANALOG ATT** is used to attenuate (reduce) the level of the analog input signal.

### 9 SLEEP

Lights when the sleep mode is active.

### 10 Tuner indicators

#### ○ / MONO

Lights when the mono mode is set using the **MPX** button.

#### ⊙ / STEREO

Lights when a stereo FM broadcast is being received in auto stereo mode.

### Y<sup>TM</sup> / TUNED

Lights when a broadcast is being received.

### 11 EON/RDS indicators

#### EON

Lights when the EON mode is set, and flashes during an EON broadcast. The  indicator lights when the current station carries the EON service.

#### RDS

Lights when an RDS broadcast is received.

### 12 Speaker indicators

Lights to indicate the current speaker system, **A** and/or **B**.

### 13 Character display

#### 14 ADV. SURR. (Advanced Surround)

Lights when one of the Advanced Surround modes has been selected.

#### 15 WMA9 Pro

Lights to indicate decoding of a WMA9 Pro signal.

#### 16 MIDNIGHT

Lights during Midnight listening.

#### 17 D.E.

Lights when Dialog Enhancement is switched on.

#### 18 LOUDNESS

Lights during Loudness listening.

#### 19 Master volume level

Shows the overall volume level.

#### 20 MCACC channel EQ / Sound Retriever / HDMI indicators

These indicators show the EQ balance for each channel in Checking your Acoustic Calibration EQ settings. Also, **L** and **R** light when the Sound Retriever is active.

In addition, the HDMI connection state is displayed as shown below.

Blinks when connecting an HDMI-equipped component: lights when the component is connected.

### Remote control Illustration shows the VSX-918V model

- 1 INPUT SELECT**  
Use to select the input source (use **SHIFT** for **INPUT SELECT** ).
- 2 RECEIVER**  
Switches the receiver between standby and on.
- 3 MULTI CONTROL buttons**  
Press to select control of other components.
- TV CTRL, PORTABLE and CD-R buttons** can be used with **SHIFT** button.

- 4 RECEIVER CONTROL buttons**
  - AUTO/DIRECT**  
Switches between Auto surround mode (Auto playback on) and Stream Direct playback. Direct playback bypasses the tone controls for the most accurate reproduction of a source.
  - STEREO/A.L.C.**  
Switches between stereo playback, Auto level control stereo mode and Front Stage Surround Advance modes.
  - STANDARD**  
Press for Standard decoding and to switch between **PRO LOGIC II** options.
  - ADV SURR**  
Switches between the various surround modes.
  - PHASE**  
Press to switch on/off Phase Control.
  - ACOUSTIC EQ**  
Press to select an Acoustic Calibration EQ setting.
  - DIALOG**  
Use to make dialog stand out when watching TV or a movie.
  - SOUND RETRIEVER**  
Press to restore CD quality sound to compressed audio sources.
  - MUTE**  
Mutes/unmutes the sound.
  - CH SEL**  
Press repeatedly to select a channel, then use **LEVEL +/-** to adjust the level.
  - LEVEL +/-**  
Use to adjust the channel levels.
  - MASTER VOLUME +/-**  
Use to set the listening volume.

- 5 System Setup and Component control buttons**  
The following button controls can be accessed after you have selected the corresponding **MULTI CONTROL** button (**DVD, DVR, RECEIVER**, etc.).
  - AV PARAMETER**  
Use to access the AV options.
  - TOP MENU**  
Displays the disc 'top' menu of a DVD.
  - ONE TOUCH COPY\***  
Copies the currently playing title from DVD to HDD or vice-versa.
  - GUIDE**  
Displays/changes the subtitles on multilingual DVDs.
  - PTY SEARCH**  
Use to search for RDS program types.
  - SETUP**  
Press to access the System Setup menu. Also functions as the **SETUP** button for DVD/DVR units.

**T.EDIT**

Memorizes/names stations for recall.

**MENU**

Displays the disc menu of DVD-Video discs.

**RETURN**

Confirm and exit the current menu screen.

**CH +/-\***

Use to select channels for DVD/DVR units.

**6** **↑↓←→ (TUNE↑/↓, ST←/→), ENTER**

Use the arrow buttons when setting up your surround sound system. Also used to control DVD menus/options.

Use the **TUNE↑/↓** buttons can be used to find radio frequencies and the **ST←/→** buttons can be used to select preset radio stations.

**7 Component control buttons**

The main buttons (▶, ■, etc.) are used to control a component after you have selected it using the **MULTI CONTROL** buttons.

The controls above these buttons can be accessed after you have selected the corresponding **MULTI CONTROL** button (for example **DVD, DVR** or **TV** (when connected to a DTV)).

**SUBTITLE\***

Displays/changes the subtitles included in multilingual DVD-Video discs.

**● REC\***

Start recording.

**AUDIO\***

Changes the audio language or channel on DVD discs.

**HDD\*, DVD\***

These buttons switch between the hard disk and DVD controls for HDD/DVD recorders.

**REC STOP\***

Stops recording.

**JUKEBOX\***

Switches to the Jukebox feature.

**TV/DTV**

Switches between the analog TV and DTV input modes for Pioneer flat screen TVs.

**8 Number buttons and other component controls**

Use the number buttons to directly select a radio frequency or the tracks on a CD, DVD, etc. There are other buttons that can be accessed after the **RECEIVER** button is pressed. (For example **MIDNIGHT**, etc.)

**TUNER DISP\***

Switches between named station presets and radio frequencies.

**CLASS\***

Switches between the three banks (classes) of radio station presets.

**MPX\***

Switches between stereo and mono reception of FM broadcasts. If the signal is weak then switching to mono will improve the sound quality.

**D.ACCESS\***

After pressing, you can access a radio station directly using the number buttons.

**MIDNIGHT**

Switches to Midnight or Loudness listening.

**ANALOG ATT**

Attenuates (lowers) the level of an analog input signal to prevent distortion.

**DIMMER**

Dims or brightens the display.

**SLEEP**

Press to change the amount of time before the receiver switches into standby (**30 min – 60 min – 90 min – Off**). You can check the remaining sleep time at any time by pressing **SLEEP** once.

**SIGNAL SEL**

Use to select an input signal.

**SR + (VSX-918V model only)**

Switches the SR+ mode on/off.

**EON\***

Use to search for programs that are broadcasting traffic or news information.

**iPod CTRL**

Switches between the iPod controls and the receiver controls.

**DISC (ENTER)**

Use to enter commands for TV or DTV, and also use to select a disc in a multi-CD player.

**9 INFO**

Use to bring up information screens on a digital TV.

**10 SHIFT**

Press to access the 'boxed' commands (above the buttons) on the remote. These buttons are marked with an asterisk (\*) in this section.

**11 Remote control LED**

Lights when a command is sent from the remote control.

**12** **⏻ SOURCE**

Press to turn on/off other components connected to the receiver.

**13 RECEIVER**

Switches the remote to control the receiver (used to select the green commands above the number buttons (**SETUP**, etc)). Also use this button to set up surround sound.

**14 TV CONTROL buttons**

These buttons are dedicated to control the TV assigned to the **TV CTRL** button. Thus if you only have one TV to hook up to this system assign it to the **TV CTRL MULTI CONTROL** button. If you have two TVs, assign the main TV to the **TV CTRL** button.

⏻ Use to turn on/off the power of the TV.

**INPUT SELECT**

Use to select the TV input signal.

**TV CH +/-**

Use to select channels.

**TV VOL +/-**

Use to adjust the volume on your TV.

## Using this receiver with a Pioneer flat screen TV

(VSX-918V model only)

If you have a Pioneer flat screen TV <sup>1</sup>, you can use an SR+ cable to connect it to this unit and take advantage of various convenient features, such as automatic video input switching of the flat screen TV when the input is changed.

**Note**  
<sup>1</sup> This receiver is compatible with all Pioneer flat screen TVs from 2003 onward.

- Use a 3-ringed miniplug SR+ cable <sup>1</sup> to connect the CONTROL IN jack of this receiver with the CONTROL OUT of your flat screen TV.

Before you can use the extra SR+ features, you need to make a few settings in the receiver.

## Using the SR+ mode with a Pioneer flat screen TV

When connected using an SR+ cable, a number of features become available to make using this receiver with your Pioneer flat screen TV even easier. These features include:

- On-screen volume display.
- On-screen display of listening mode.
- Automatic video input switching on the flat screen TV.
- Automatic volume muting on the flat screen TV.<sup>2</sup>

**1** Make sure that the flat screen TV and this receiver are switched on and that they are connected with the SR+ cable.

**2** To switch SR+ mode on/off, press RECEIVER, then the SR+ button. The front panel display shows SR+ ONorOFF.

To make the most of the SR+ features, you should connect your source components (DVD player, etc.) in a slightly different way to that described in this chapter. For each component, connect the video output directly to the flat screen TV, and just connect the audio (analog and/or digital) to this receiver.

**Note**  
<sup>1</sup> The 3-ringed SR+ cable from Pioneer is commercially available under the part number ADE7095. Contact the Pioneer Customer Support division for more information on obtaining an SR+ cable (you can also use a commercially available 3-ringed mini phone plug for the connection).  
 • If you connect to a Pioneer flat screen TV using an SR+ cable, you will need to point the remote control at the flat screen TV remote sensor to control the receiver. In this case, you won't be able to control the receiver using the remote control if you switch the flat screen TV off.  
<sup>2</sup> The automatic volume muting feature is enabled separately.

## 3. BASIC ITEMS FOR SERVICE

### 3.1 CHECK POINTS AFTER SERVICING

To keep the product quality after servicing, confirm recommended check points shown below.

No.	Procedure	Check points
1	Confirm whether the customer complain has been solved. If the customer complain occurs with the particular source, such as Dolby Digital, DTS, AAC, DVD-A and HDMI, input it for the operation check.	The customer complain must not be reappeared. Video, Audio and operations must be normal.
2	Check the analog audio playback. (Make the analog connections with a DVD player.)	Each channel audio and operations must be normal.
3	Check the digital audio playback. (Make the digital connections with a DVD player.)	Each channel audio and operations must be normal.
4	Check surround playback. (Select Surround mode and check the multichannel operations via the DSP circuit.)	Each channel audio and operations must be normal.
5	Check the video outputs. (Connect with a DVD player.)	Video and operations must be normal.
6	Check the sound from headphone output.	Sound must be normal, without noise.
7	Check the appearance of the product.	No scratches or dirt on its appearance after receiving it for service.

See the table below for the items to be checked regarding video and audio:

Items to be checked regarding video	Item to be checked regarding audio
Block noise	Distortion
Horizontal noise	Noise
Dot noise	Volume too low
Disturbed image (video jumpiness)	Volume too high
Too dark	Volume fluctuating
Too bright	Sound interrupted
Mottled color	

### ■ CLEANING

Before shipping out the product, be sure to clean the following positions by using the prescribed cleaning tools:

Position to be cleaned	Cleaning tools
Fans	Cleaning paper : GED-008

### 3.2 JIGS LIST

#### ■ Jigs list

Name	Jig No.	Remarks
13P board to board extension jig cable	GGD1483	Diagnosis
21P board to board extension jig cable	GGD1485	Diagnosis

### 3.3 PCB LOCATIONS

#### VSX-918V

# 5. DIAGNOSIS

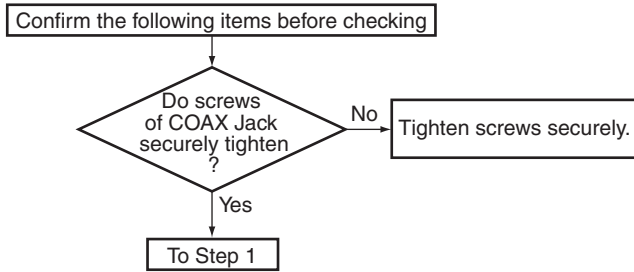

## 5.1 DIAGNOSIS FLOWCHART

### [1] DSP TROUBLESHOOTING

#### ■ Troubleshooting for all destination

- When a sound is not out in the multi-CH signal playback mode or surround mode with the COAX, OPT, USB or HDMI input. (SurroundBack is not output by setting.)
- Suppose CR to be normal contact and that is not damaged.
- This shows failure analysis of DSP Block.

#### Step 0: Preliminary confirmation

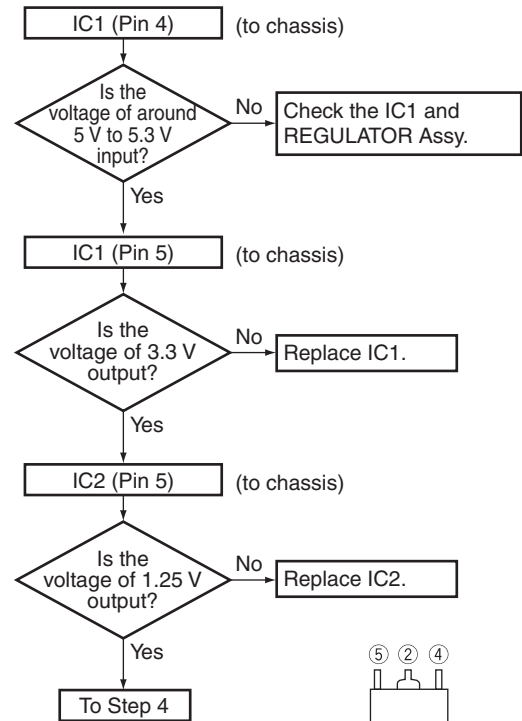

#### Step 1: MUTE pin

#### Step 2: BtoB connector and FFC

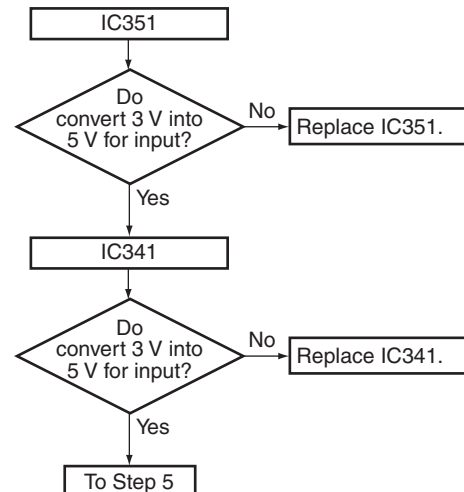

#### Step 3: Regulator IC

Part shape and Pin arrangement of IC1 and IC2

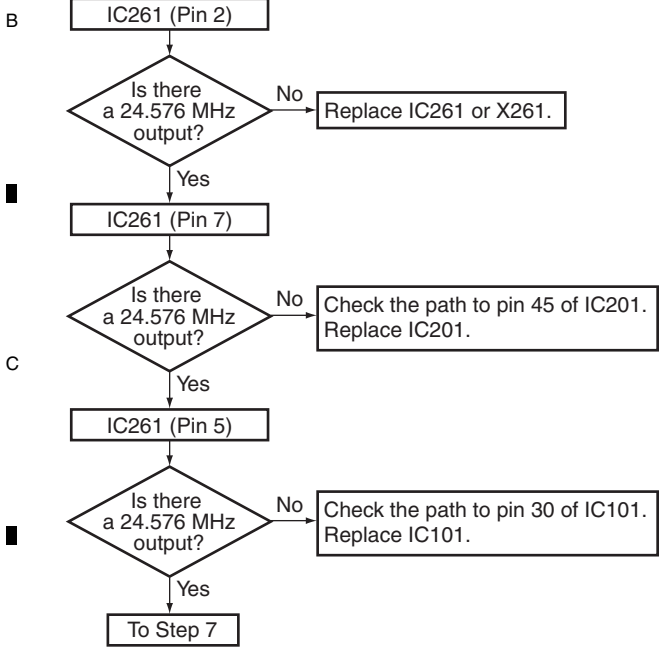

#### Step 4: 3 V to 5 V conversion

### Step 5: 5 V to 3 V conversion

### Step 6: X'tal

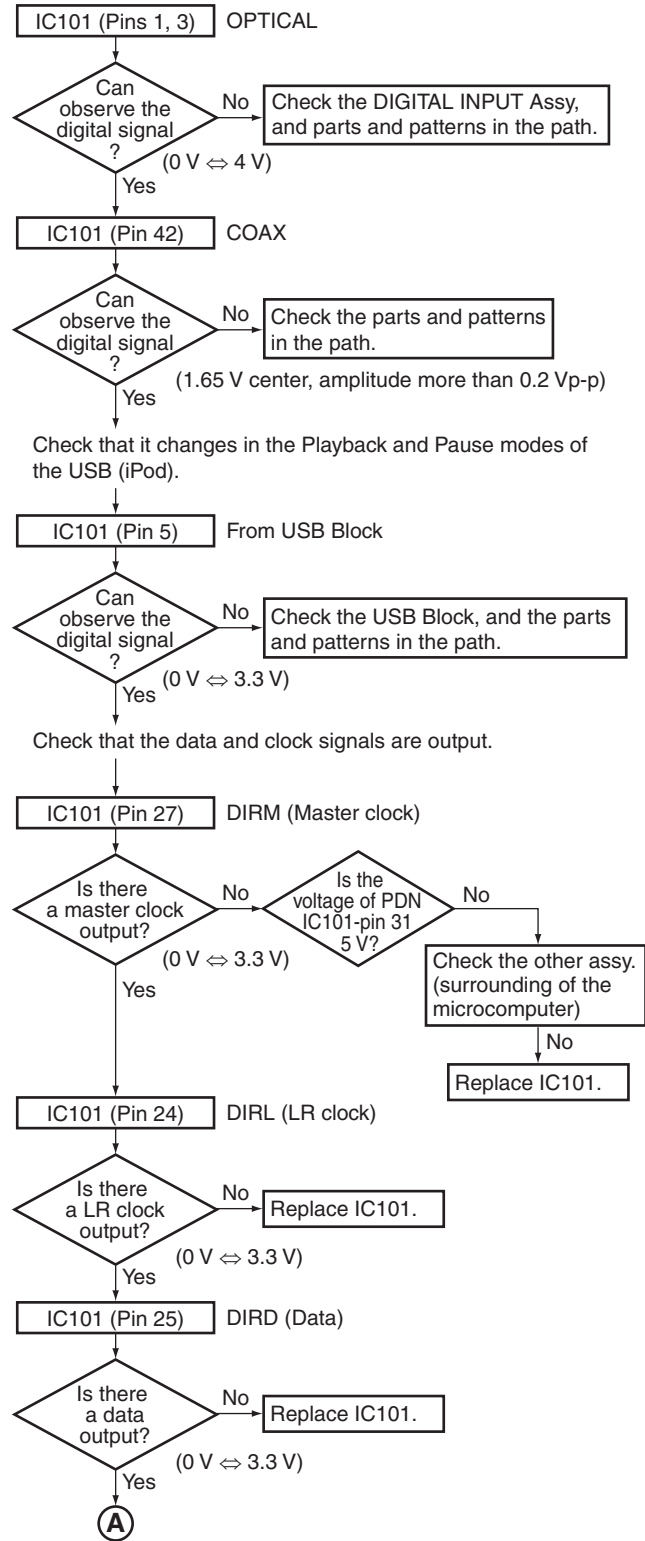

### Step 7

When the COAX, OPT or USB is input, go to Step 7-1.  
When the HDMI is input, go to Step 7-2.

### Step 7-1: DIR

Check that the S/PDIF signal is output.  
Check that changes by pulling out and inserting the digital input lines.

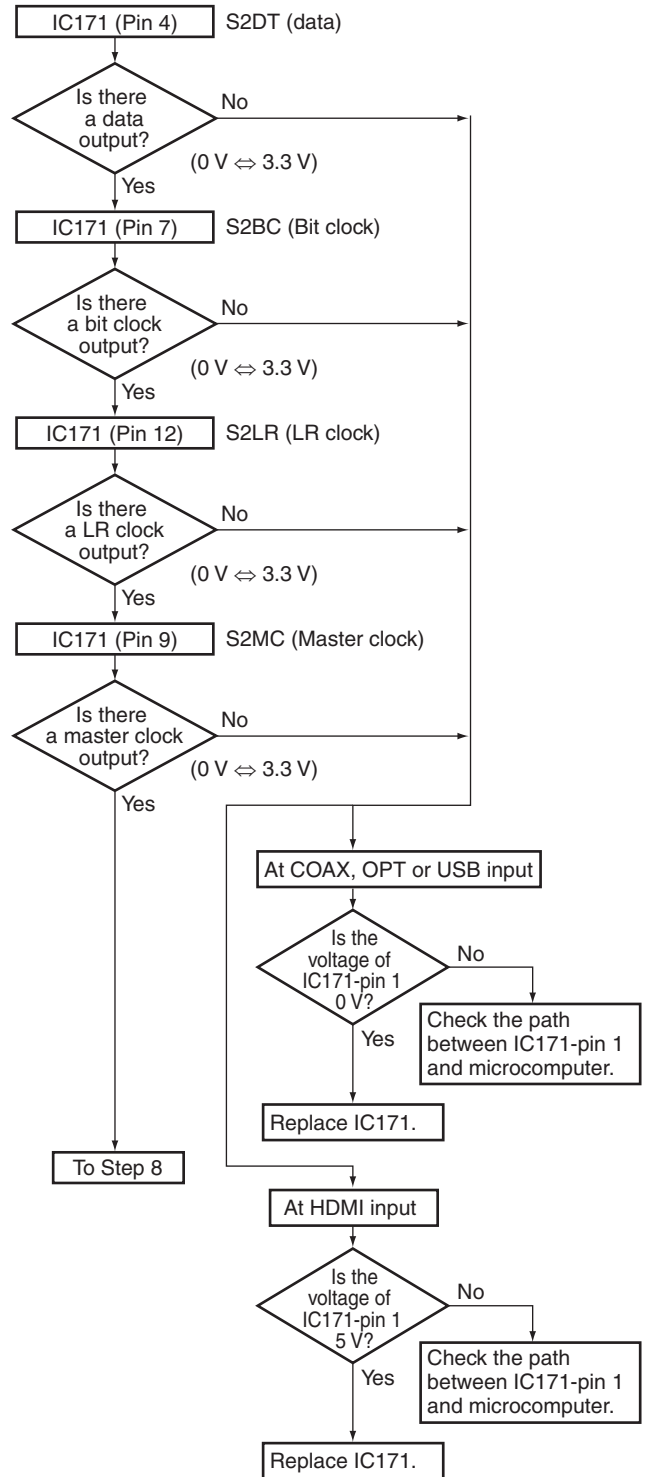

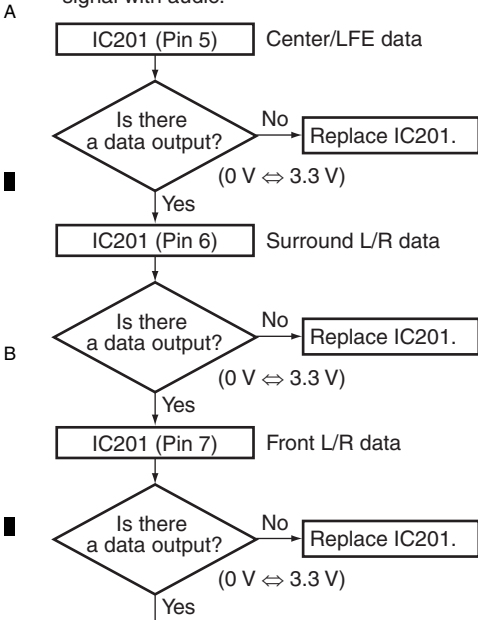

**Step 7-2 (AWX9162 only)**

Check that the data and clock signals are output.

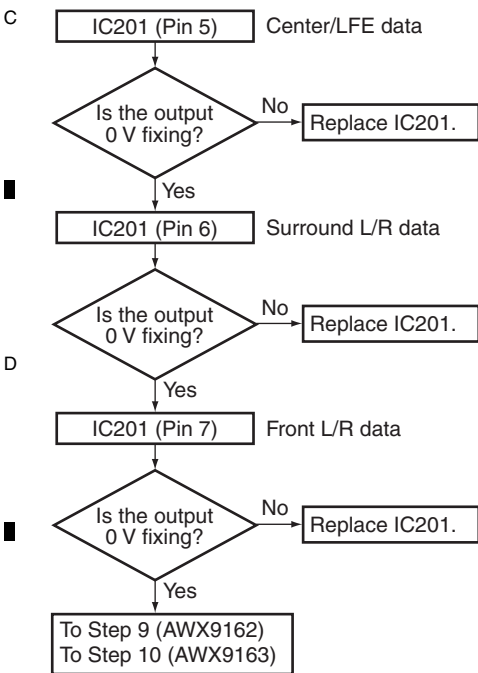

### Step 8: DSP output (digital)

Digital output of each CH when inputting the digital signal with audio.

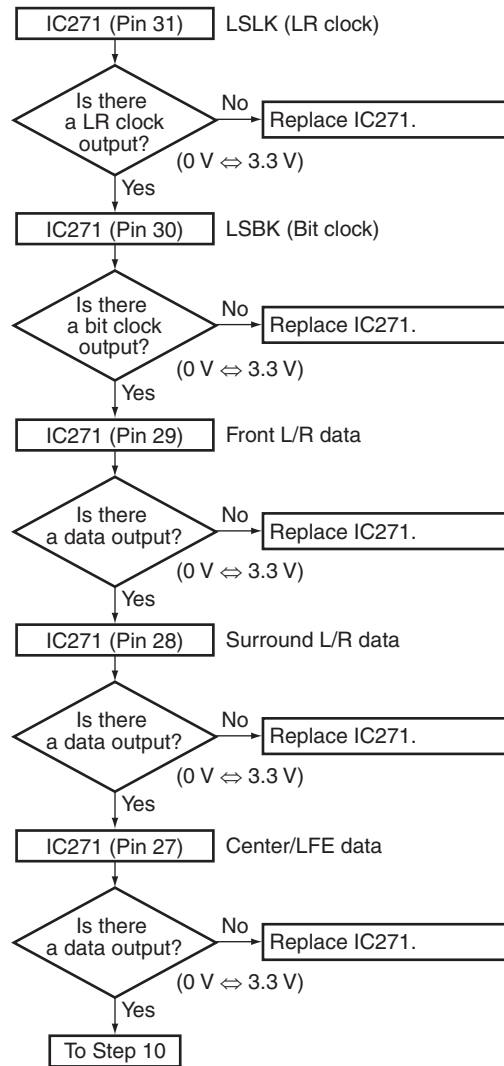

Digital output of each CH when inputting the digital signal (-∞ dB (no audio)).

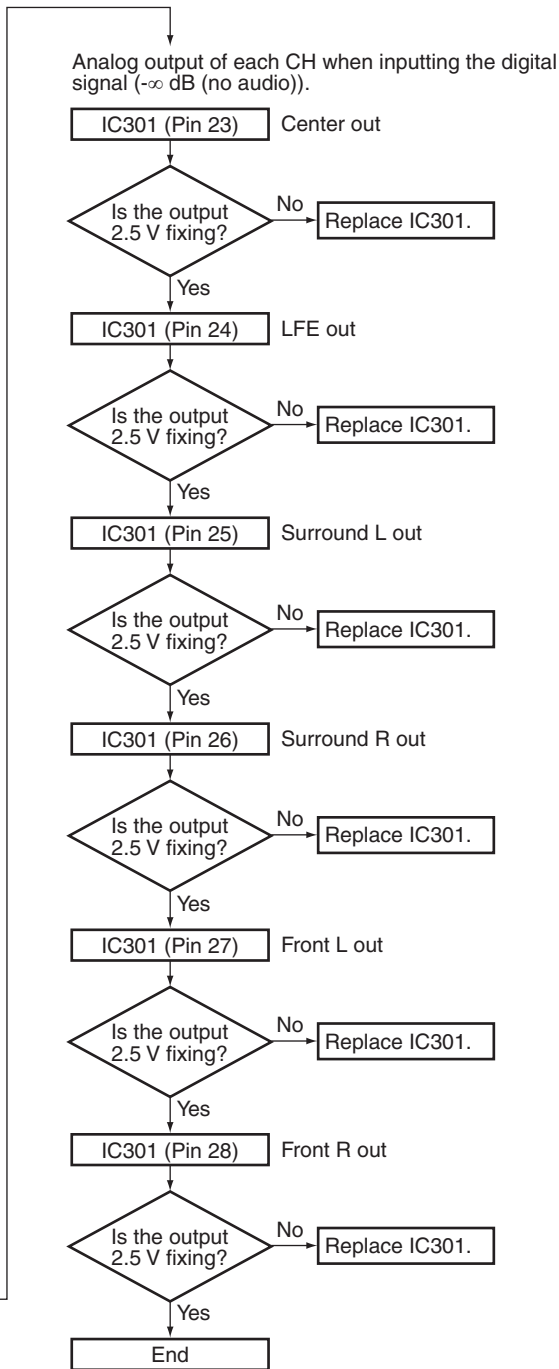

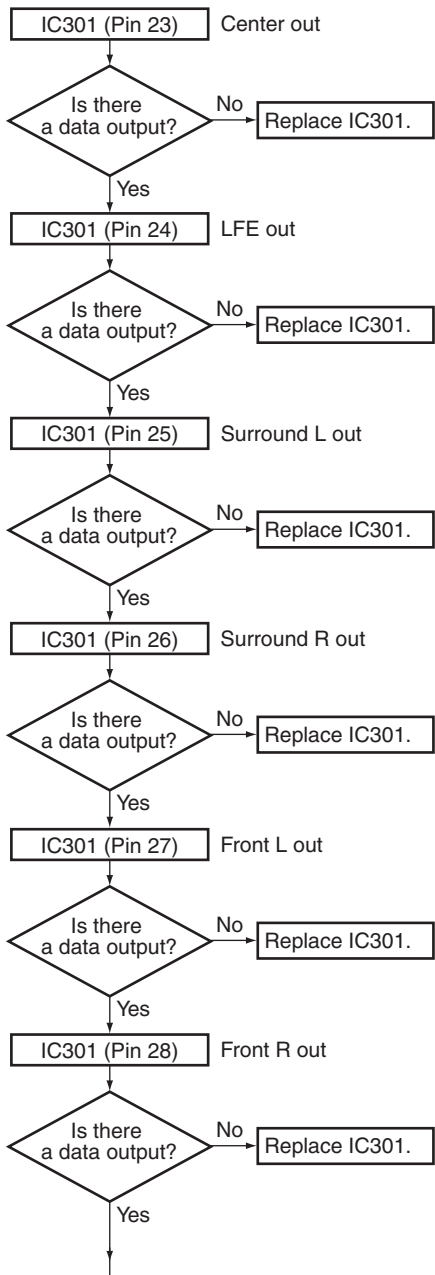

### Step 9: LIPSYNC output (Digital) (AWX9162 only)

Check that the data and clock signals are output.

### Step 10: Codec output (analog)

Analog output of each CH when inputting the digital signal with audio.

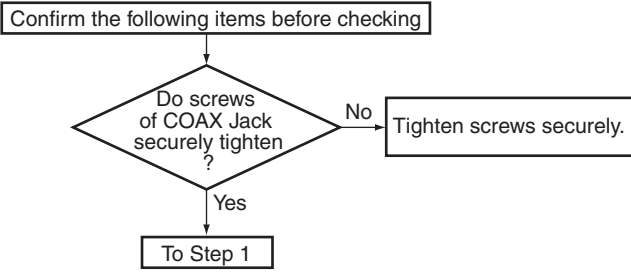

A  
B  
C  
D  
E  
F

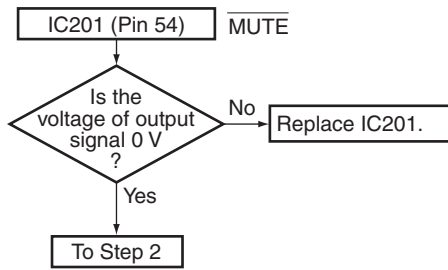

### Troubleshooting in the MCACC mode

- When the MCACC mode is turned on (SurroundBack is not output by setting.)
- Suppose CR to be normal contact and that is not damaged.
- This shows failure analysis of DSP Block.

#### Step 0: Preliminary confirmation

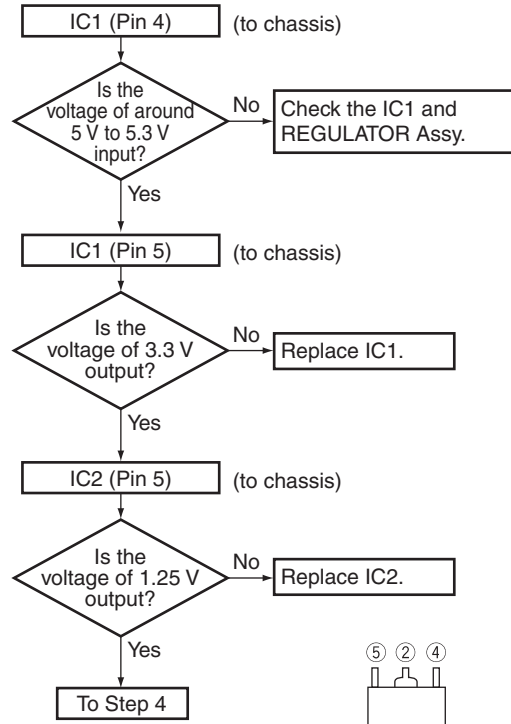

#### Step 1: MUTE pin

#### Step 2: BtoB connector and FFC

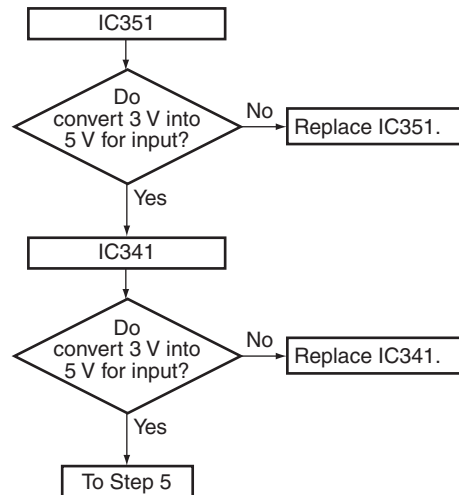

#### Step 3: Regulator IC

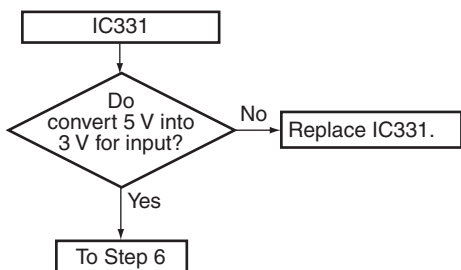

Part shape and Pin arrangement of IC1 and IC2

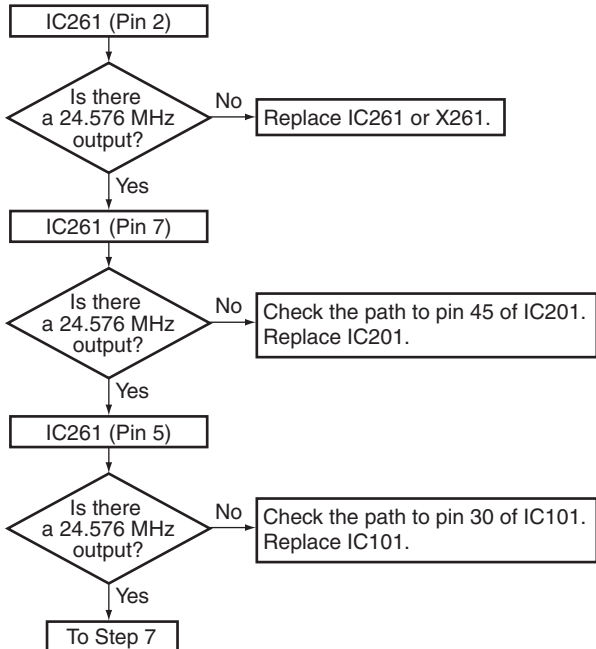

#### Step 4: 3 V to 5 V conversion

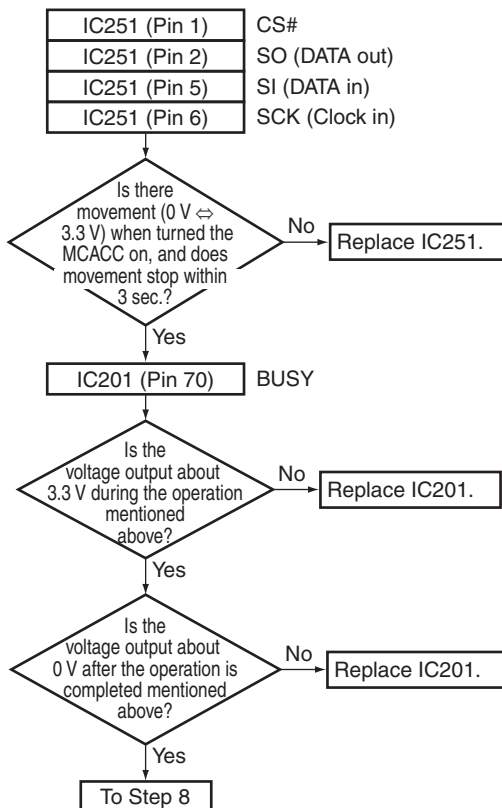

**Step 5: 5 V to 3 V conversion**

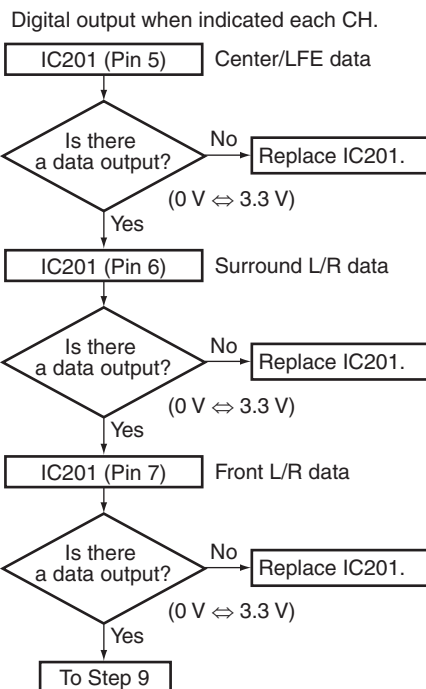

**Step 6: X'tal**

**Step 7: ROM**

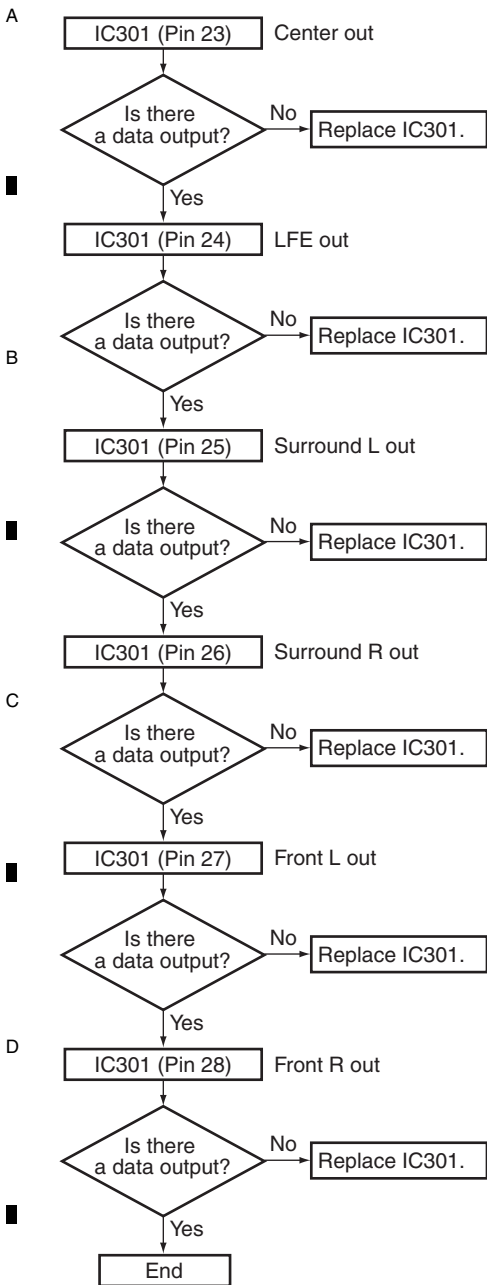

**Step 8: DSP output (digital)**

### Step 9: CODEC output (analog)

Analog output when indicated each CH.

## [2] USB TROUBLESHOOTING

### Description of Error Indications

FL Display	Error Content	Possible causes and actions to be taken
USB ERROR1	Detection of overcurrent to a USB device	Overcurrent (500 mA or more) is consumed at the connected USB device. <ul style="list-style-type: none"> <li>Some USB devices, such as a portable HDD, need more current than that this unit supplies. (Use the AC adaptor for the connected USB device.)</li> <li>The USB power is short-circuited.</li> </ul>
USB ERROR2	Detection of a medium not supported	A USB device that this unit does not support (other than the Mass Storage Class) is connected (such as a mouse, printer, or digital camera). <ul style="list-style-type: none"> <li>Connect a mass storage class USB device.</li> </ul>
USB ERROR3	Communication error with the system microcomputer	Communication between TCC8600-00X-EA-UG (IC401) and PEG467/469A (IC9001) failed. <ul style="list-style-type: none"> <li>Defective connection (connectors) inside this unit</li> <li>See STEP 3 of Troubleshooting.</li> </ul>

If a USB ERR message lights in the display, try following the points below:

- Switch the receiver off, then on again.
- Reconnect the USB device with the receiver switched off.
- Select another input source (like DVD/BD), then switch back to USB.
- Use a dedicated AC adaptor (supplied with the device) for USB power.

If this doesn't remedy the problem, it is likely your USB device is incompatible.

### Operations when overcurrent to a USB device is detected

- (1) Overcurrent to a USB device is detected at the port for the microcomputer.
- (2) The power supply to the USB device is stopped.
- (3) Control of 5 V power is disabled at the port for the microcomputer.
- (4) Change of indications on the FL display

Flashes for 2 sec.

U:S:B: E:R:R:1

Lights up after flashing for 2 sec.

U:S:B: E:R:R:1

- (5) To supply power to the USB module again:

- Turn the power to the unit off then back on.
- Set the function setting to anything other than USB then back to USB.
- Press the USB play key on the remote control unit.

- (6) After overcurrent is detected, if the USB play key is pressed while the error indication is displayed, power supply to the USB module is restored. If overcurrent is no longer detected, the indications shown below are displayed (normal indication):

U:S:B:

In this state, flashing of "USB ERROR1" stops, but playback will not start. To start playback, press the USB play key again.

In the above case, if overcurrent is detected again, the above procedures 1 through 4 are repeated.

### In a case where a medium not supported is connected

- (1) Change of indications on the FL displays

Flashes for 2 sec.

U:S:B: E:R:R:2

Lights up after flashing for 2 sec.

U:S:B: E:R:R:2

If overcurrent is detected before detection of a non-supported medium, the error indication "USB ERROR1" remains, as the power supply to the USB module is stopped.

### On supported media

The formats of supported media that can be played back on this unit are MP3, WMA, and AAC.

Some media in MPEG4 can also be played back. As AAC derives from MPEG4 codec, playback of media in AAC codec of MPEG4 is possible.

### ■ iPod Error Message

A When the abnormality occurred, the error messages are indicated.

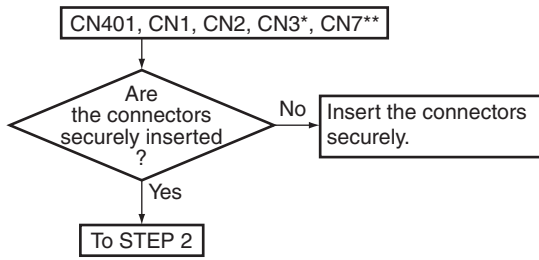

key sequence change	OSD display	FL display
<p>Error I1 Communication Error When the communication is not possible normally.</p> <p>[Procedure] Disconnect a connector once, then connect a connector surely again after the main menu of the iPod was displayed. Nevertheless, reset the iPod when the iPod does not operate normally.</p>		<p>(8-digit) <b>ERROR I1</b></p>
<p>Error I2 Protocol Ver.Error (in the Type 2 operation only) When a version of the iPod software is old.</p> <p>[Procedure] Update the iPod software to the newest version.</p>		<p>(8-digit) <b>ERROR I2</b></p>
<p>Error I3 Generation Error (in the Type 1 operation only) When the non-support model for the iPod Mode Type 1 was connected. When the non-support function will be executed. When a version of the iPod software is old.</p> <p>[Procedure] Change the iPod Mode to Type2. Update the iPod software to the newest version.</p>		<p>(8-digit) <b>ERROR I3</b></p>
<p>Error I4 Loading Error When there is no response from the iPod.</p> <p>[Procedure] The power is shut off once, then the unit back on. Reset the iPod. Update the iPod software to the newest version.</p>		<p>(8-digit) <b>ERROR I4</b></p>
<p>No Music Track No Music Track Cautuion When a music track does not exist in the connected iPod.</p> <p>[Procedure] Transfer a music track to the iPod. When play a video track, turn on the iPod CTRL, and playback a track by operating the main unit of the iPod.</p>		<p>(8-digit) <b>NO MUSIC</b></p>
<p>No Track No Music Track Cautuion When a track does not exist in the selected category</p> <p>[Procedure] Select another category.</p>	<p>An object folder name is displayed.</p> 	<p>(8-digit) <b>NO TRACK</b></p>

### [3] HDMI TROUBLESHOOTING

#### ■ HDMI Simple Diagnosis (VSX-918V)

##### 1. Causes for noncompletion of HDMI authentication between the source equipment and this unit (the HDMI indicator is unlit or flashes)

##### 2. Causes for noncompletion of HDMI authentication between the monitor and this unit (no display or sound from the monitor)

#### ■ HDMI Simple Diagnosis (VSX-818V)

##### Causes for no display or sound from the monitor

# HDMI Troubleshooting (VSX-818V)

• This shows failure analysis of the HDMI Assy.

## Preparation

### Step 1-1: Screws on the rear panel

### Step 1-2: FFC

### Step 1-3: Connect the HDMI equipment

Source equipment:  
Connect a DVD player to HDMI 1 or HDMI 2.

Sink equipment:  
Connect a TV to HDMI OUT.

### Step 1-4: POWER ON

Turn on the power of the Receiver and equipments which was connected with HDMI.

### Step 1-5: Function switch (HDMI 1 or HDMI 2)

Switch the function that HDMI was assigned.  
Factory shipments setting:  
HDMI 1: DVD  
HDMI 2: TV

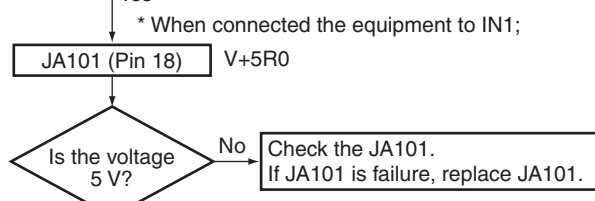

To Step 2

## Diagnosis

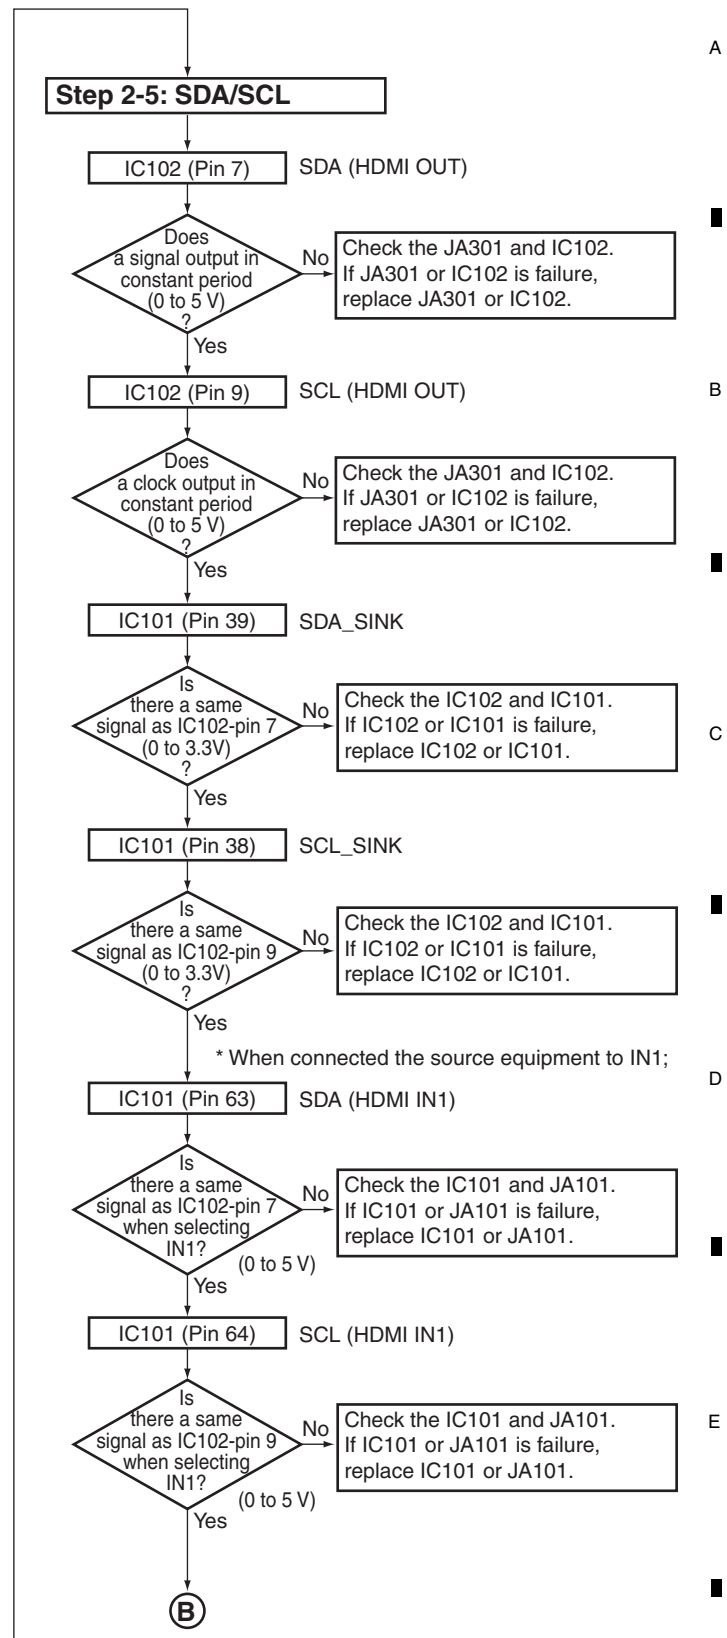

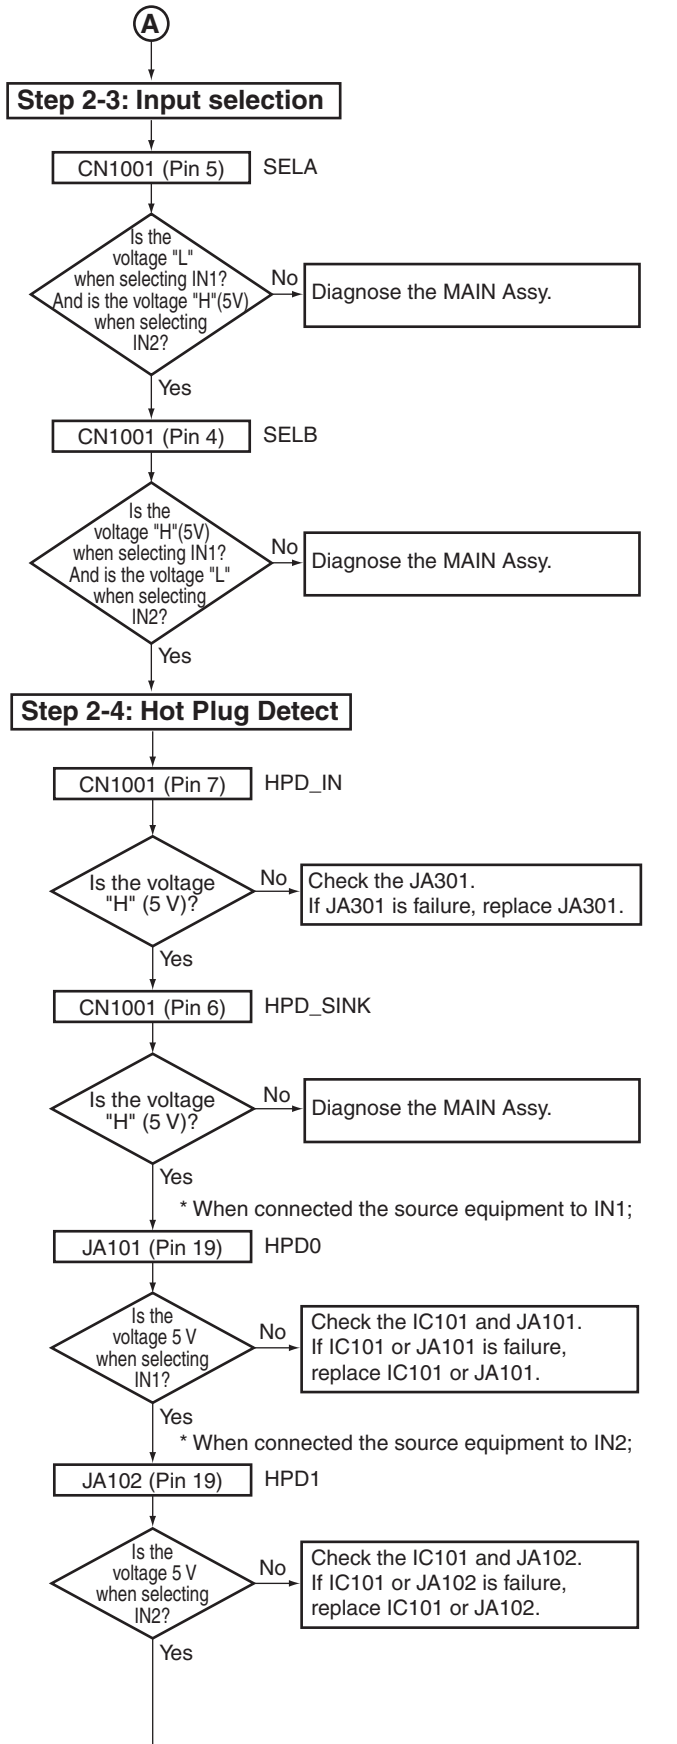

### Step 2-1: CE

### Step 2-2: Power supply

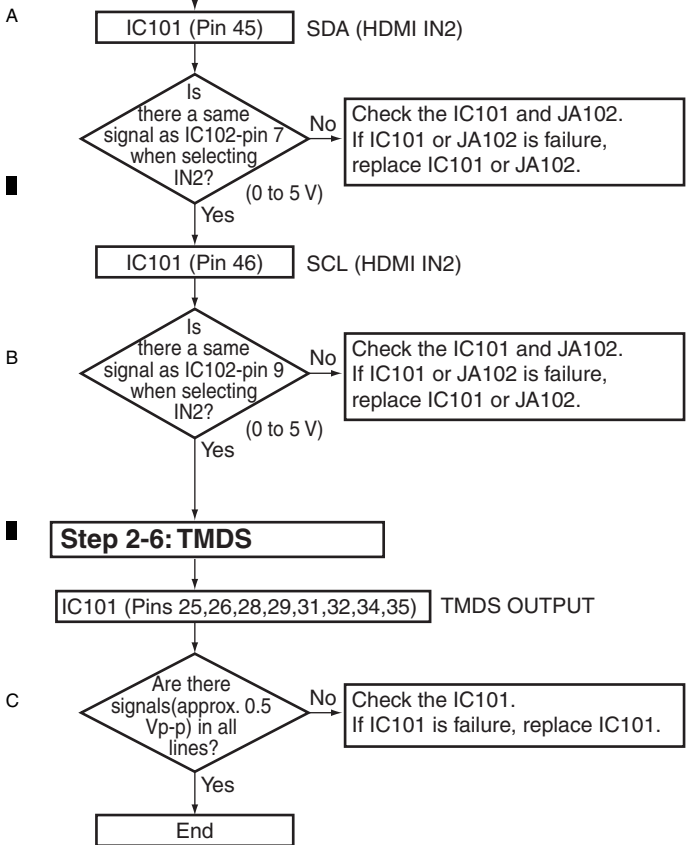

A

(B)

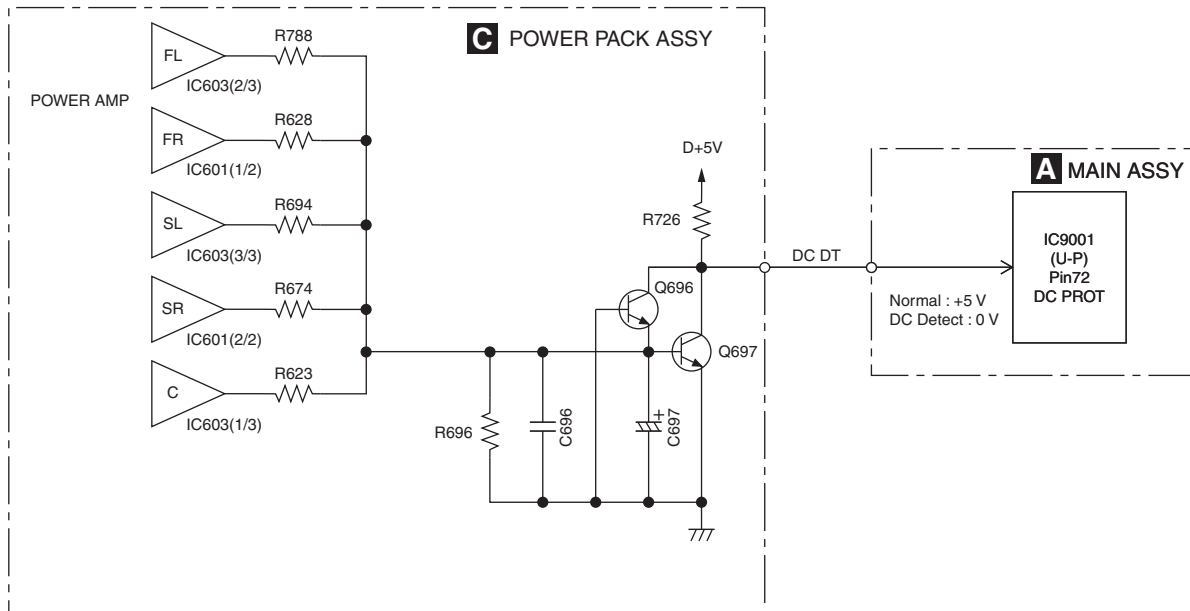

\* When connected the source equipment to IN2;

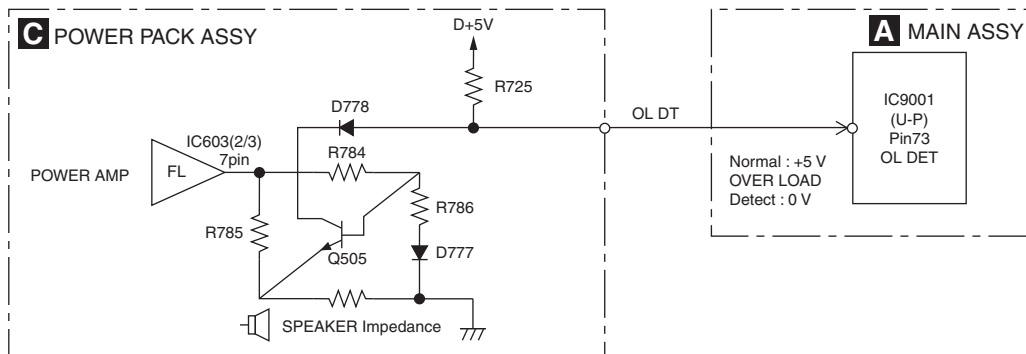

# 5.2 DETECTION CIRCUIT

### 1. DC Derrection Circuit Diagram : Example of VSX-918V/KUXJ/CA

### 2. Overload Detection Circuit Diagram: Example of VSX-918V/KUXJ/CA FRONT Channel

### 3. Fan Stop Protection Circuit Diagram

### 4. XPROTECT Detection Circuit Diagram

When below 6 kind of voltage supply become to be short circuit to GND, XPROTECT circuit work and U-P input port voltage change from +5 V to 0 V. The U-P detect this condition as ERROR.

- Voltage supply to POWER AMP IC (V neck+)
- Voltage supply to POWER AMP IC (V neck-)
- Voltage supply to +12 V REGULATOR IC
- Voltage supply to -12 V REGULATOR IC

## 5.3 AMPLIFIER SYSTEM PROTECTION OPERATION SPECIFICATION

### 1. DC-abnormality detection

DC detection is only enabled 2 seconds after power-on.

If there is a fault in the power amplifier or a high-level signal lower than 5 Hz is input, the DC\_DET port becomes "L".

If the "L" is detected, the microprocessor will perform as following flow chart.

In the case of simultaneous detection with the overload protection circuit, DC-abnormality detection is performed preferentially to overload detection.

\*A.MUTE : Audio mute command

However, when the following keys are pushed so that the key input of a line and the service can be carried out, power can be on.

① TESTMODE ON (A55F+A55F)

② When power off, push TUNE+ key + AUTO SURR/DIRECT key continuously 2sec.

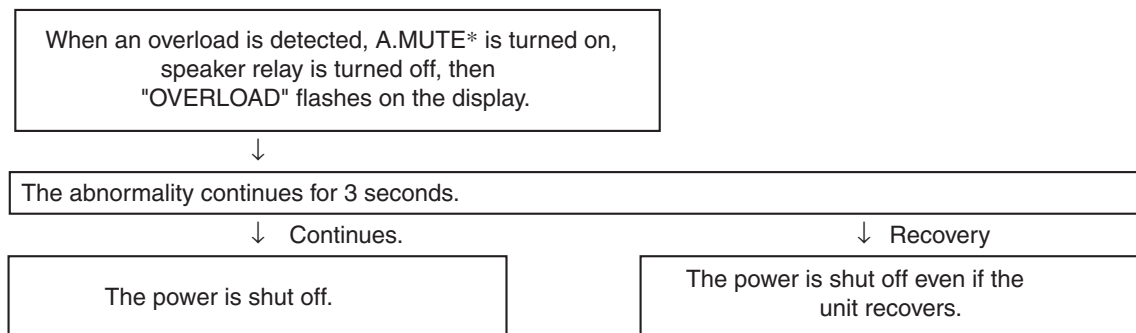

(②: When a DC abnormality is detected and the power is shut off.)

Any other key input from front panel or remote control will not be detected.

### 2. Overload detection

If the speaker terminals are short-circuited or low-load driving is detected, the OL\_DET port becomes "L".

If the "L" is detected, the microprocessor will perform as following flow chart.

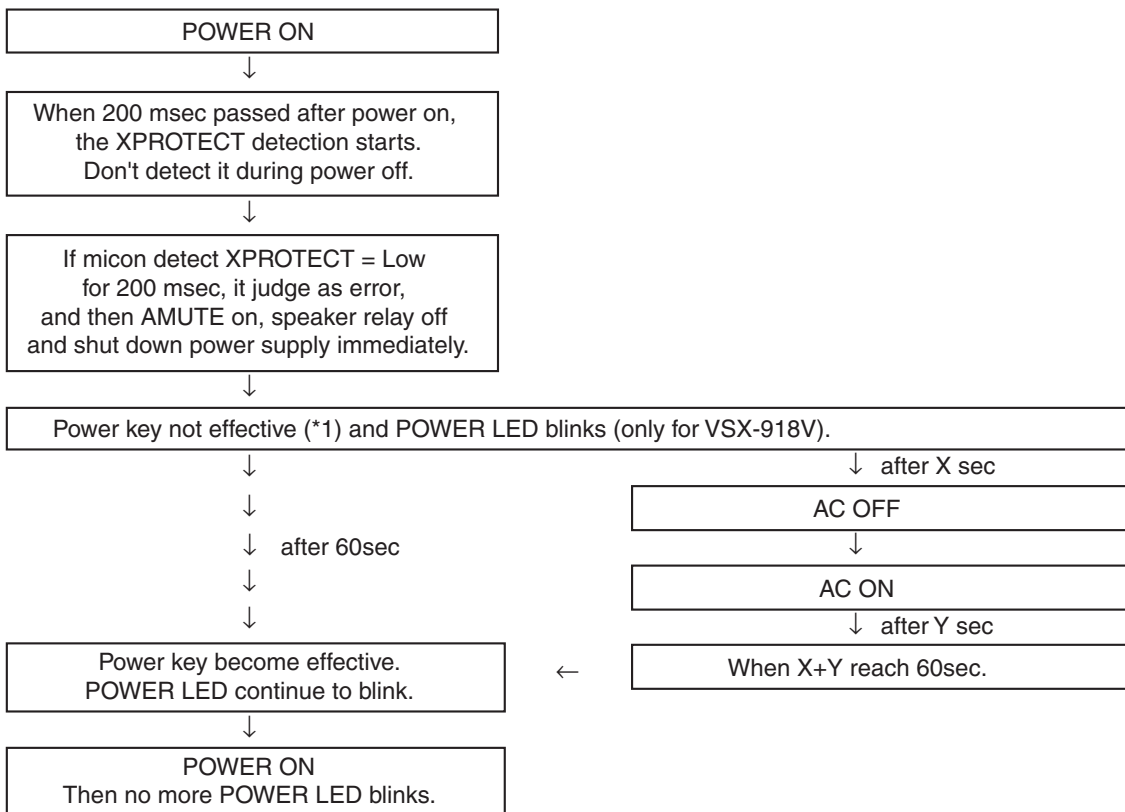

### 3. XPROTECT detection

XPROTECT is started to be monitored 200msec after power on.

XPROTECT port is checked every 20msec.

If Low level (ERROR) is recognized during consecutive 9 times, micon judge it as XPROTECT ERROR.

It processes more preferentially than DC abnormal detection and overload detection.

(\*1) However, when the following keys are pushed so that the key input of a line and the service can be carried out, power can be on.

① TESTMODE ON (A55F+A55F)

② When power off, push TUNE+ key + AUTO SURR/DIRECT key continuously 2sec.

(Effective, only when power-off is carried out by DC detection / XPROTECT detection)

Any other key input from front panel or remote control will not be detected.

### 4. Fan stop detection operation flow in the XPROTECT detection

If the fan is forcibly stopped or become out of order, the 'XPROTECT' port becomes "L". Then an abnormality of fan is detected.

- Detection routine and recovery is same as "3. XPROTECT detection".

# 6. SERVICE MODE

There is no information to be shown in this chapter.

A  
B  
C

# 7. DISASSEMBLY

**Note 1:** Even if the unit shown in the photos and illustrations in this manual may differ from your product, the procedures described here are common.

**Note 2:** For performing the diagnosis shown below, the following jigs for service are required:

- Extension jig cables : GGD1483, GGD1485

## Diagnosis of HDMI

**Caution:**

Heatsink section in work becomes hot, and be careful with it.

① Remove the bonnet by removing the six screws.

• For VSX-918V

- ① Remove the three screws.
- ② Remove the one screw.
- ③ Disconnect the two connectors.
- ④ Remove the HDMI&DSP&USB Assy.

- ⑤ Connect the two extension jig cables.  
GGD1483  
(HDMI&DSP&USB CN1 <=> POWER PACK CN805)  
GGD1485  
(HDMI&DSP&USB CN2 <=> POWER PACK CN806)
- ⑥ Connect the ground line.  
(HDMI&DSP&USB COAX terminal <=> Rear panel,  
One of the three HDMI terminals <=> Rear panel)

↓  
**Diagnosis**

● For VSX-818V

- ① Remove the three screws.
- ② Remove the one screw.
- ③ Release the PCB holder.
- ④ Remove the HDMI Assy.
- ⑤ Release the PCB holder.
- ⑥ Disconnect the two connectors.
- ⑦ Remove the DSP&USB Assy.

- ⑧ Connect the two extension jig cables.  
GGD1483  
(DSP&USB CN1 <=> POWER PACK CN805)  
GGD1485  
(DSP&USB CN2 <=> POWER PACK CN806)
- ⑨ Connect the ground line.  
(DSP&USB COAX terminal <=> Rear panel)  
(HDMI One of the three HDMI terminals <=> Rear panel)

**Diagnosis**

# Diagnosis of the Unit

## Caution:

Heatsink section in work becomes hot, and be careful with it.

① Remove the bonnet by removing the six screws.

① Remove the two screws.

② Remove the one screw.

③ Remove the two screws.

④ Remove the one screw.

⑤ Remove the push rivet.

⑥ Remove the BIND Assy by removing the one screw.

⑦ Remove the one screw.

⑧ Release the binders, as required.

⑨ Arrange the unit as shown in the photo below.

↓  
**Diagnosis**

**Caution:**

During diagnosis, be sure NOT to remove the four screws marked ① in the above photo. There is the case that a product does not work normally when removes these screws.

① One of the three terminals

# Disassembly

## Front Panel Section

### Caution:

Heatsink section in work becomes hot, and be careful with it.

① Remove the bonnet by removing the six screws.

① Remove the five screws.

② Remove the two screws.

③ Unhook the two hooks.

④ Remove the front panel section.

## 8. EACH SETTING AND ADJUSTMENT

### 8.1 HOW TO UPDATE FIRMWARE

#### ■ USB Firmware Update

##### [Purpose]

Refer to this section when updating the USB firmware is required by the service information, etc.  
It is able to update the USB firmware by using USB flash memory.

##### [Necessary Tools]

- USB Flash Memory which is saved the firmware file ("player.rom" file).

##### Note:

In rare cases, it is not able to update the firmware depending on the type of USB flash memory.  
In such a case, try to use other model of USB flash memory.

##### [Procedures]

1. Tuner VOL to "-- dB".
2. Turn off the set.
3. Press "Standby/On" and "PHASE CONTROL" keys simultaneously for about 5 secs.  
"USB" or "IPOD" will be displayed on FL, soon after that "WAITING" display will appear.  
Then after about 20 secs, the current USB firmware version will be shown.
4. Insert the USB memory device containing latest USB firmware to the USB slot on front panel.  
Soon "UPDT 000" will appear on FL, followed by the progress counting down.
5. When it is finished, "COMPLETE" will appear on FL.
6. Turn off the set, then turn it on again.
7. You may check the version by turning the set to off, then pressing "Standby/On" and "PHASE CONTROL" keys simultaneously for about 5 secs.

##### Note:

- Do NOT reconnect the USB flash memory which is saved the "player.rom" file.
- Do NOT change the function setting or turn off the power during step 5 through 7.  
If you do, the updating is failed and it is required to replace the USB flash ROM on the USB module.

1 2 3 4

# 9. EXPLODED VIEWS AND PARTS LIST

NOTES: ● Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.  
 ● The  $\triangle$  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.  
 ● Screws adjacent to  $\blacktriangledown$  mark on product are used for disassembly.  
 ● For the applying amount of lubricants or glue, follow the instructions in this manual.  
 (In the case of no amount instructions, apply as you think it appropriate.)

## 9.1 PACKING SECTION

56

VSX-918V-K

1 2 3 4

**(1) PACKING SECTION PARTS LIST**

<u>Mark No.</u>	<u>Description</u>	<u>Part No.</u>	<u>Mark No.</u>	<u>Description</u>	<u>Part No.</u>
1	FM Wire Antenna	ADH7030	NSP 16	Warranty Card	ARY7111

# 11. PCB CONNECTION DIAGRAM

## 11.1 DSP & USB and HDMI ASSYS

### SIDE A

#### NOTE FOR PCB DIAGRAMS :

1. Part numbers in PCB diagrams match those in the schematic diagrams.
2. A comparison between the main parts of PCB and schematic diagrams is shown below.
3. The parts mounted on this PCB include all necessary parts for several destinations.  
For further information for respective destinations, be sure to check with the schematic diagram.
4. View point of PCB diagrams.

# 12. ELECTRICAL PARTS LIST

**NOTES:**

- Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.
- The  $\Delta$  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.
- When ordering resistors, first convert resistance values into code form as shown in the following examples.

Ex.1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J=5%, and K=10%).

560  $\Omega$   $\rightarrow$  56 x 10<sup>1</sup>  $\rightarrow$  561 ..... RD1/4PU  $\overline{561}J$   
 47k  $\Omega$   $\rightarrow$  47 x 10<sup>3</sup>  $\rightarrow$  473 ..... RD1/4PU  $\overline{473}J$   
 0.5  $\Omega$   $\rightarrow$  R50 ..... RN2H  $\overline{R50}K$   
 1  $\Omega$   $\rightarrow$  1R0 ..... RS1P  $\overline{1R0}K$

Ex.2 When there are 3 effective digits (such as in high precision metal film resistors).

5.62k  $\Omega$   $\rightarrow$  562 x 10<sup>1</sup>  $\rightarrow$  5621 ..... RN1/4PC  $\overline{5621}F$

● Meaning of the figures and others in the parentheses in the parts list.

Example) IC 301 is on the point (face A, 91 of x-axis, and 111 of y-axis) of the corresponding PC board.

IC 301 (A, 91, 111) IC NJM2068V
