

Press hang up key to power on your phone.

Input PIN1 code, press right soft key to clear error, press confirm to finish.

For example, if PIN1 code is set as 1234, then input as below:

1 2 3 4

if PIN code is input continuously incorrectly to three times, the SIM card will be locked, when, you need PUK1 code to unlock SIM card. If you don't know PUK1 code, please contact your network supplier..

3.2.5 Phone Lock

In order to prevent illegal usage, you can set password in your mobile phone. Once this function is chose, each time you power on your phone, you must input phone password, and you can unlock the phone only by this way, and then send or answer the call. Users can remove phone password, in this case, the phone can not prevent illegal usage.

Input the mobile phone password, use the right soft key to clean error input, and press confirm to finish it.

For example, if the password of mobile phone is set to be 1122, input 1122.

* The default password is '1122', please change the password to your own as quick as possible. Suppose that you forgot your phone password, you must contact with your retailer or local authorized maintenance center to unlock your password.

3.2.6 Connect to Network

After the SIM card is decrypted successfully, the phone can automatically search the available network (the searching network is displayed on the screen). Once contacted, the network supplier's name will appear on the center of the screen. At this time the handset enters standby status normally and can be used to call and receive calls.

* Note: "Only for Emergency" is reminded on the screen, as means that your handset is out of the normal network coverage (service range), but you still can give an emergency call according to signal intensity.

4. Normal Function Introduction

4.1 Dial Phone Number

When the network supplier's signs appear on the screen, you can call or answer the telephone. The information bar on the upper left corner of the screen shows the network signal strength. (there are five information bars means that the strongest signal) Call quality is impacted more by the barrier, and so your handset is moved in a small area, as will be able to effectively improve the call quality.

4.1.1 Dial Domestic Phone Number

Input telephone numbers with the numeric key and then press dial key to begin calling. If you need to change the telephone numbers, please press the right soft key to delete characters. The screen will display the called animation while dialing. After the other side picks up, the screen will show the called status information, and if you open the tone, there will be a tone (be subjected to network support).

After the call ends, press the **hang up key** to hang up.

Zone number + Phone number + Dialing Key

4.1.2 Dial Fixed Extension Phone Number:

Some fixed extension can not be directly called; you need to first get through the telephone exchange and then dial the extension. When you input the phone number, insert the symbol "P" between the telephone exchange number and the extension number, the phone will complete all your dial-up, automatically dial the extension. The method of inputting "P" is to long press * key (here symbol "P" is displayed on the screen).

Zone number + Telephone exchange number + P + Extension number + Dial key

4.1.3 Dial International Call Number:

To make an international call, you can not long press * key until the prefix symbol "+" of the international long-distance telephone number is displayed. This will allow you to dial any national telephone call even if you do not know the prefix of the local international telephone number (for example, it is 00 for China).

Input the prefix and then input the country code and the whole phone number you want to call. Country code complies with the usual practice, Germany 49, Britain 44, Sweden 46 and so on.

"0" ahead of the city code should be removed when dialing, as is the same as to call a usual international telephone.

For example, to call a hotline from other countries, you should dial:

+86 21 114

+ Country code + Whole phone number + Dial key

4.1.4 Dial phone in call list

The numbers you dialed out and received are all saved in a list in your phone, recent dialed and received number showed in the first. Every number is classified by dialed, received and missed.

View dialed number, press dial key.
